The Dwarf's Doubloons Isaac Hallenberg, 2010-01-06 This book is a continuation of one of the short stories from the author s book Rustbelt Fables It involves a reprise of the Fitzpatrick family and their disingenuous daughter April who finds

in varying degrees love lust and trouble Central to the book s plot is the robbery by a dwarf of gold coins and other treasures from a pawnshop Then the search for the missing loot begins with the involvement of the owner Backdoor Bill a corrupt plainclothes detective a private eye an entire family of Greek entrepreneurs and a holocaust survivor who runs a downtown kiosk and gathers information for sale And above them all hovers the Rustbelt mob led by their enforcer Beans O Toole

Animal Architects James L Gould,Carol Grant Gould,2012-03-06 Animal behavior has long been a battleground between the competing claims of nature and nurture with the possible role of cognition in behavior as a recent addition to this debate There is an untapped trove of behavioral data that can tell us a great deal about how the animals draw from these neural strategies The structures animals build provide a superb window on the workings of the animal mind Animal Architects examines animal architecture across a range of species from those whose blueprints are largely innate such as spiders and their webs to those whose challenging structures seem to require intellectual insight planning and even aesthetics such as bowerbirds nests or beavers dams Beginning with instinct and the simple homes of solitary insects James and Carol Gould move on to conditioning the cognitive map and how it evolved and the role of planning and insight Finally they reflect on what animal building tells us about the nature of human intelligence showing why humans unlike many animals need to build castles in the air

Changing Diversity in Changing Environment Oscar Grillo,Gianfranco Venora,2011-11-14 As everybody knows the dynamic interactions between biotic and abiotic factors as well as the anthropic ones considerably affect global climate changes and consequently biology ecology and distribution of life forms of our planet These important natural events affect all ecosystems causing important changes on biodiversity Systematic and phylogenetic studies biogeographic distribution analysis and evaluations of diversity richness are focal topics of this book written by international experts some even considering economical effects and future perspectives on the managing and conservation plans
