The Male Dancer Ramsay Burt, 2003-09-02 In this challenging and lively book Ramsay Burt examines the representation of masculinity in twentieth century dance Taking issue with formalist and modernist accounts of dance which dismiss gender and sexuality as irrelevant he argues that prejudices against male dancers are rooted in our ideas about the male body and male behaviour Building upon ideas about the gendered gaze developed by film and feminist theorists Ramsay Burt provides a provocative theory of spectatorship in dance He uses this to examine the work of choreographers like Nijinsky Graham Bausch while relating their dances to the social political and artistic contexts in which they were produced Within these readings he identifies a distinction between institutionalised modernist dance which evokes an essentialist heroic hypermasculinity one which is valorised with reference to nature heterosexuality and religion and radical avant garde choreography which challenges and disrupts dominant ways of representing masculinity The Male Dancer will be essential reading for anyone interested in dance and the cultural construction of gender

Turovski, 2011-11-30 The book is the first annotated reader to focus specifically on the discipline of zoosemiotics. Zoosemiotics can be defined today as the study of signification, communication and representation within and across animal species. The name for the field was proposed in 1963 by the American semiotician Thomas A. Sebeok. He also established the framework for the paradigm by finding and tightening connections to predecessors, describing terminology, developing methodology and setting directions for possible future studies. The volume includes a wide selection of original texts accompanied by editorial introductions. An extensive opening introduction discusses the place of zoosemiotics among other sciences as well as its inner dimensions: the understanding of the concept of communication in zoosemiotics, the heritage of biologist Jakob von Uexküll, contemporary developments in zoosemiotics and other issues. Chapter introductions discuss the background of the authors and selected texts as well as other relevant texts. The selected texts cover a wide range of topics such as semiotic constitution of nature, cognitive capabilities of animals, typology of animal expression and many other issues. The roots of zoosemiotics can be traced back to the works of David Hume and John Locke. Great emphasis is placed on the heritage of Thomas A. Sebeok and a total of four of his essays are included. The Reader also includes influential studies in animal communication: honey bee dance language, vervet monkey alarm calls as well as theory elaborations by Gregory Bateson and others. The reader concludes with a section dedicated to contemporary research. Readings in Zoosemiotics is intended as a primary source of information about zoosemiotics and also provides additional readings for students of cognitive ethology and animal communication studies.
