X-Urbanism Mario Gandelsonas, 1999 Examines configurations of urban space analyzing them in ways that blur the traditional opposition between figure and ground

First Skyscrapers Amelia Khatri, 2025-02-19 First Skyscrapers explores the birth of these iconic structures and their transformative impact on urban environments The book argues that skyscrapers emerged not just from technological advancements like steel frame construction but as a direct response to escalating land values and rapid urbanization in the 19th century Discover how the invention of the elevator played a crucial role in making these towering buildings practical reshaping cityscapes and redefining urban life The book begins by setting the stage with the conditions that necessitated vertical expansion It then delves into the innovations in construction and elevator technology Figures like William Le Baron Jenney and Louis Sullivan are examined highlighting their architectural philosophies and the challenges they overcame in cities like Chicago and New York By drawing from architectural plans engineering reports and historical accounts First Skyscrapers offers a comprehensive understanding of how these buildings were conceived and constructed It reveals how these early skyscrapers left a lasting imprint on urban planning social dynamics and our overall perception of city living making it an invaluable resource for understanding modern urban development

The Horizontal Skyscraper Bjørn B. Erring, 2002 Chinese cities are undergoing profound changes Urban development has transformed the townscape low rise structures based on courtyard type housing horizontal in character have been replaced by vertical constructions In the 1980s and 1990s Chinese cities were featured by the conflicting wishes for rapid modernization and cultural continuity The articles of this book refer to experiences drawn from this particular period of time and are selected among case studies and related theoretical considerations The case studies are concentrated on four cities Beijing Xi an Quanzhou and Shanghai The authors have all been active in different fields of urban transformation in historic Chinese cities They are politicians historians

planners anthropologists architects and scholars The articles describe the substantial transformation of the cities and the implications of this change The contributing authors represent three countries China France and Norway They all participated in two conferences in 1995 and 1996 dealing with urban renewal in housing areas of traditional Chinese cities The outcome of these conferences constitute the raw material for this book **Skyscraper for the XXI Century** Carlo Aiello, 2008-01-01 This book presents the best 60 projects of the 2006 2007 and 2008 Skyscraper Competition An investigation by architects students and designers on the future of the skyscraper What is the skyscraper in the beginning of the XXI Century What is the historical and social context of these mega structures What is their response towards the urban fabric Is the modern skyscraper a city in and of itself Is the human scale lost Talented architects have entered these competitions to explore re think and speculate on this fascinating architectural genre Each project includes a full description by the author as well as several illustrations and drawings In addition renowned architects were invited to present their thoughts on this fascinating architectural genre **The American Skyscraper** Roberta Moudry, 2005-05-09 Publisher Description **International Encyclopedia of Housing and Home**, 2012-10-09 Available online via SciVerse ScienceDirect or in print for a limited time only The International Encyclopedia of Housing and Home Seven Volume Set is the first international reference work for housing scholars and professionals that uses studies in economics and finance psychology social policy sociology anthropology geography architecture law and other disciplines to create an international portrait of housing in all its facets from meanings of home at the microscale to impacts on macro economy This comprehensive work is edited by distinguished housing expert Susan J Smith together with Marja Elsinga Ong Seow Eng Lorna Fox O Mahony and Susan Wachter and a multi disciplinary editorial team of 20 world class scholars in all Working at the cutting edge of their subject liaising with an expert editorial advisory board and engaging with policy makers and professionals the editors have worked for almost five years to secure the quality reach relevance and coherence of this work A broad and inclusive table of contents signals or testifies to detailed investigation of historical and theoretical material as well as in depth analysis of current issues This seven volume set contains over 500 entries listed alphabetically but grouped into seven thematic sections including methods and approaches economics and finance environments home and homelessness institutions policy and welfare and well being Housing professionals both academics and practitioners will find The International Encyclopedia of Housing and Home useful for teaching discovery and research needs International in scope engaging with trends in every world region The editorial board and contributors are drawn from a wide constituency collating expertise from academics policy makers professionals and practitioners and from every key center for housing research Every entry stands alone on its merits and is accessed alphabetically yet each is fully cross referenced and attached to one of seven thematic categories whose wholes far exceed the sum of their parts **Project of Crisis** Marco Biraghi, 2013-08-30 An examination of the influential Italian architectural historian Manfredo Tafuri's historical construction of contemporary architecture The

influential Italian architectural historian Manfredo Tafuri 1935 1994 invoked the productive possibilities of crisis writing that history is a project of crisis progetto di crisi In this entry in the Writing Architecture series Marco Biraghi explores Tafuri's multifaceted and often knotty oeuvre using the historian's concept of a project of crisis as a lens through which to examine his historical construction of contemporary architecture Mindful of Tafuri's statement that there is no such thing as criticism only history Biraghi carefully maps the influences on Tafuri's writing Walter Benjamin Karl Krauss Massimo Cacciari and the architect Ludovico Quaroni among others in order to create a portrait of one of the most complex minds in twentieth century architecture and architectural history Tracing an arc from Tafuri's first articles in the magazine Contropiano to the idea of contradiction at the center of the project of crisis Biraghi cites Tafuri's writing on some of his contemporaries including Louis Kahn Le Corbusier Robert Venturi Aldo Rossi and the Five Architects Peter Eisenman Michael Graves Charles Gwathmey John Hejduk and Richard Meier Tafuri's historical construction of the contemporary Biraghi explains is based on the idea that the past is open providing the present with ever changing and indeterminate form There is no contradiction between Tafuri the historian and Tafuri the contemporary critic only the greatest possible integration The importance of Tafuri's interpretation of architecture goes beyond mere academic or historiographic interest Biraghi argues Tafuri's notion of the project of crisis is fundamentally important in understanding our present day architectural condition

The Political Afterlife of Sites of Monumental Destruction Andrea Connor, 2017-06-14 What happens when a monumental thing is physically destroyed Is its life as a socially significant presencing thing at an end Or might the process of destruction work to enhance its symbolic force mediating work and presencing power In this book Andrea Connor traces the afterlife of two exemplary examples of monumental destruction and their re investment with cultural value and symbolic significance In 1993 during the Bosnian war the Mostar Bridge was completely destroyed Reconstructed in 2004 as an exact copy of the original this new Old Bridge has assumed an afterlife as an intentional monument to reconciliation The World Trade Centre in New York has also been transformed since its destruction in 2001 as a place of national mourning and remembrance a symbolic void marking a singular act of terrorism Using recent work on affect and object agency Connor considers their contested reconfiguration as sites of collective remembering and forgetting in new highly charged political contexts She argues for a more expansive notion of reconstruction encompassing not only the material and symbolic afterlife of both things but also their affecting afterlives as they are re assembled in the present Provoking a reconsideration of the way monuments and heritage sites even in their absence become powerful agents of historical narrativization this work will be of interest to students and scholars in a range of fields including international relations cultural studies critical heritage studies and material culture studies

Second Century of the Skyscraper Council on Tall Buildings & Urban, 2012-12-06 tenant is looming in importance The owner is having more influence on the building As Gerald D Hines has said there are indications that the desire for more discretionary time will lead to more residential high rises close to or in the midst of downtown office buildings Downtown living could become the desired alternative Tall buildings will be approached increasingly from the standpoint of an urban ecology that what happens to a part can influence the whole Providing for public as well as private needs in a tall building project is just one example facilities for schools shops religious and other needs More attention will be paid to maintaining streets as lively and interesting places Will a new world's tallest be built Will we go a mile high The answer is probably yes to the first no to the second With the recent spate of super tall buildings on the drawing boards going to greater heights was in the back of many people's minds at the Chicago conference But in the United States at least buildings of 70 to 80 stories would appear to provide needed space consistent with economy The future then is described in depth by papers that go into specific areas

Rethinking Modernism and the Built Environment Almantas Samalavičius, 2017-06-23 This volume is a passionate scholarly inquiry focused on some of the most pressing issues confronting contemporary architectural practice urbanism and city making Presented in the form of conversations with leading architects urbanists and internationally renowned architectural historians and urban thinkers this concise book reviews and critiques the legacy of Modernism and its impact on global urbanisation Timely thoughtful and thought provoking these conversations conducted by the editor during the last few years urge the rejection of some of the most

widespread dogmas and often dangerously limiting and misguided intellectual legacies of urban and architectural thinking. The contributors recommend a search instead for more enlightened architectural practices urban planning and city making in the new millennium when environmental problems have become particularly pressing. In this volume readers will find not only glimpses into possible urban futures but a thorough review of what now often appear as the shackles of the not so distant Modernist past.

Approaching Urban Design Marion Roberts, Clara Greed, 2014-06-06. This companion to *Introducing Urban Design Interventions and Responses* shows how the principles and concepts of urban design can be applied and implemented in a range of real world settings.

American Urban Form Sam Bass Warner, Jr., Andrew Whittemore, 2013-08-16. An illustrated history of the American city's evolution from sparsely populated village to regional metropolis. *American Urban Form* the spaces places and boundaries that define city life has been evolving since the first settlements of colonial days. The changing patterns of houses buildings streets parks pipes and wires wharves railroads highways and airports reflect changing patterns of the social political and economic processes that shape the city. In this book Sam Bass Warner and Andrew Whittemore map more than three hundred years of the American city through the evolution of urban form. They do this by offering an illustrated history of the City a hypothetical city constructed from the histories of Boston Philadelphia and New York that exemplifies the American city's transformation from village to regional metropolis. In an engaging text accompanied by Whittemore's detailed meticulous drawings they chart the City's changes. Planning for the future of cities they remind us requires an understanding of the forces that shaped the city's past.

The Skyscraper Curse Mark Thornton, 2018-08-01. *The Skyscraper Curse* is Dr Mark Thornton's definitive work on booms and busts and it explains why only Austrian economists really understand them. It makes business cycle theory accessible to a whole new 21st century audience. And they need it especially those under 40. Many of the brilliant quants working on Wall Street and at the Fed barely remember the Crash of 2008 much less understand it. But Mark Thornton does and his book is a warning about overheated equity markets over inflated housing prices and clueless central bankers. Given the shaky stock markets lately 2018 may be the year the Fed's latest bubble bursts. And when it does it will be even more painful than 10 years ago. In fact US household and business debt is now one trillion dollars higher than 2008. Mark is well known as an expert on bubbles and Fed malfeasance. His work appears in outlets like Wall Street Journal Bloomberg Forbes The Economist Barron's and Investor's Business Daily. His now infamous Skyscraper Index theory draws the connection between loose monetary policy artificially low interest rates and vanity construction projects. Put the three together and it doesn't turn out well. And let's not forget that Dr Thornton was among only a handful of economists

to warn about the dangerous housing bubble in 2004 and again in 2006 Cabbies and waiters bought up condos with no money down in places like Las Vegas Prices rose 25 percent or more every year in some coastal markets Even people with terrible credit financed houses at five or seven times their annual income All of it was made possible by the Fed and its mania for low interest rates So when the experts said Nobody could have seen this coming the Mises Institute had Mark's articles and papers ready to go The housing crash and the meltdown in equity markets less than a year later were thoroughly explained by Austrian business cycle theory And Mark was the capable face of the Mises Institute during it all Without a lay friendly book like *The Skyscraper Curse* millions more Americans will be duped by the next crash Dr Thornton's book tells the story that needs to be told It will be among the only alternative explanations available when the next crisis comes

The Skyscraper and the City Gail Fenske, 2008-08 Once the world's tallest skyscraper the Woolworth Building is noted for its striking but incongruous synthesis of Beaux Arts architecture fanciful Gothic ornamentation and audacious steel framed engineering Here in the first history of this great urban landmark Gail Fenske argues that its design serves as a compelling lens through which to view the distinctive urban culture of Progressive era New York Fenske shows here that the building's multiplicity of meanings reflected the cultural contradictions that defined New York City's modernity For Frank Woolworth founder of the famous five and dime store chain the building served as a towering trademark for advocates of the City Beautiful movement it suggested a majestic hotel de ville for technological enthusiasts it represented the boldest of experiments in vertical construction and for tenants it provided an evocative setting for high style consumption Tourists meanwhile experienced a spectacular sightseeing destination and avant garde artists discovered a twentieth century future In emphasizing this faceted significance Fenske illuminates the process of conceiving financing and constructing skyscrapers as well as the mass phenomena of consumerism marketing news media and urban spectatorship that surround them As the representative example of the skyscraper as a cathedral of commerce the Woolworth Building remains a commanding presence in the skyline of lower Manhattan and the generously illustrated *Skyscraper and the City* is a worthy testament to its importance in American culture
