Studies in Turkish as a Heritage Language Fatih Bayram, 2020-11-15 Heritage language bilingualism refers to contexts where a minority language spoken at home is one of the first native languages of an individual who grows up and typically becomes dominant in the societal majority language. Heritage language bilinguals often wind up with grammatical systems that differ in interesting ways from dominant native speakers growing up where their heritage language is the majority one. Understanding the trajectories and outcomes of heritage language bilingual grammatical competence performance language usage patterns identities and more related topics sits at the core of many research programs across a wide array of theoretical paradigms. The study of heritage language bilingualism has grown exponentially over the past two decades. This expansion in interest has seen in parallel extensions in methodologies applied bridges built between closely related fields such as the study of language contact and linguistic attrition. As is typical in linguistics not all languages are studied to the same degree. The present volume showcases what Turkish as a heritage language brings to bear for key questions in the study of heritage language bilingualism and beyond. In many ways Turkish is an ideal language to be studied because of its large diaspora across the world in particular Europe. The papers in this volume are diverse from psycholinguistic to ethnographic to classroom based studies featuring Turkish as a heritage language. Together they equal more than their subparts leading to the conclusion that understudied heritage languages like Turkish provide missing pieces to the puzzle of understanding the variables that give rise to the continuum of outcomes characteristic of heritage language speakers. UK-Turkey relations and Turkey's regional role Great Britain: Parliament: House of Commons: Foreign Affairs Committee, 2012-04-04 This report concludes that the Government is right to continue to support Turkey's accession to the European Union as long as Ankara meets the accession criteria and subject to the Government imposing restrictions on the right to free movement from Turkey after it joins. However at the moment shortcomings in Turkey's justice system are leading to human rights abuses including as regards freedom of expression and the media and making it harder to advocate Turkey's EU membership. Turkey's EU accession process is in any case stuck effectively it is hostage to the Cyprus dispute. The Committee said that by undermining the force of EU leverage the stalemate is having consequences that are detrimental to UK objectives in Turkey across a range of fields including not only human rights but also energy and market access issues. The Committee found this especially regrettable given that Turkish democracy may be in a critical phase and given the influence that Turkey may have at the moment over reforming Arab states. The Committee also said that by creating uncertainty over the timing if not the fact of Turkey's EU accession the stalemate was discouraging both the EU and Turkey.

from starting to address some of the most difficult issues that would be involved in Turkey's EU membership. The Government's continuing support for Turkey's EU membership has provided a strong basis for the further development of UK-Turkey bilateral relations which has significant potential. As a foreign policy partner, Turkey could potentially add value to UK foreign policy.

Historical Traumas among Armenian, Kurdish, and Turkish People of Anatolia Nermin Soyalp, 2021-12-06

The deep wounds that exist from long-standing conflicts between Turks, Kurds, and Armenians have not yet been sufficiently addressed and healed. Nermin Soyalp explains the collective traumas and their significant psychosocial impacts in terms of the potential for reconciliation among these politically conflicted groups. Discussion centres on the transgenerational implications of the Balkan wars of 1912-1913, the Armenian genocide of 1915-1917, the Greco-Turkish war of 1920-1922, the formation of the Republic of Turkey in 1923, the population exchange with the Balkans in 1924, the conflict between the Turkish government and Kurdish identity since the formation of the Republic, as well as the impacts of assimilation policies on minorities. Drawing on the complexities of history, psychology, and identity, this book elucidates how collectively and historically shared traumas become inherently more complex and more difficult to address generation by generation. Epistemologies of ignorance in Turkey have suppressed the transgenerational experiences of trauma and prevented healing modalities. The Turkish state and society have consciously and unconsciously denied historical realities such as the Armenian genocide and Kurds' ethnopolitical rights. The result is a collective dehumanization that fuels further trauma and conflicts. The collective traumas of Anatolia have impacted its society at multiple levels: psychological, physical, economic, cultural, political, and institutional. The author, a dialogue facilitator for the non-profit Healing the Wounds of History organisation, proposes systemic healing modalities that address the dynamics at play. The research that underpins this work is highly relevant to the healing of other historical and cultural traumas.
