The Day That Lightning Chased The Housewife:

The Day that Lightning Chased the Housewife Julia Leigh, David Savold, 1990-06 Essays consider questions that still elude modern science concerning the mind biology health plants and animals the Earth physics and natural phenomena

The Shape of Love Masaru Emoto, 2007-04-17 This cutting edge new work by the author of the New York Times bestseller *The Hidden Messages in Water* presents a revolutionary understanding of life and consciousness and provides answers to the most profound questions of existence Introduced in the bestselling *The Hidden Messages in Water* and the hit cult film *What the Bleep Do We Know* the groundbreaking work of Japanese scientist Masaru Emoto captured the popular imagination and launched a worldwide movement Using high speed photography Dr Emoto discovered that crystals formed in frozen water are affected by our thoughts words and feelings Since humans and the earth are composed mostly of water his findings have far reaching ramifications for individuals for human society and for the global environment In *The Shape of Love* Dr Emoto shares new images from his research and for the first time draws out the significant lessons of his work In a clear conversational style he interprets the messages hidden in his extraordinary photographs and explains how his discoveries can help us find answers to these eternal questions Where did we come from Why are we here Where will we go after we die Providing a new way of looking at such important issues as how we treat others and the earth itself Dr Emoto's findings encourage the positive actions that spell a better future for all A magnificent follow up to *The Hidden Messages in Water* *The Shape of Love* is a fascinating investigation into the intersection of science and spirituality and its impact on our lives and our world

Love Thyself Masaru Emoto, 2011-01-23 The common language that the people of the world have been seeking is found in water crystals Water speaks for what is in our mind Water awakens the subconscious memory in each person I now know why water is indispensable to the phenomenon of life and why alternative therapies exist and why they're effective Water helped me understand religion and prayer and gave me a clue to understanding the nature of energy It helped me understand the relationship between humanity and the cosmos It gave me a clue to help me understand what dimensionality is I could come one step closer to understanding the eternal theme of humanity that asks where we come from why we are here and what happens when we die Thus for the release of this the third volume in my series of *The Message from Water* I decided to choose what the world most urgently needs at present as a theme That is of course the need to eliminate war and terrorism throughout the world The theme I have chosen is prayer When I thought about it more deeply I realized that prayer is most effectively sent when each person in the world raises their energy of love by imagining a scene where the peoples of the world are living in peace I've been taught this through the process of asking water many questions For this reason the title of this book is *Love Thyself* First you must shine with positive high spirited vibrations and be full of love In order to do that I think it's important to love thank and respect yourself If that's the case then each of those vibrations will be sent out into the world and the cosmos and the great symphony of that harmonic vibration will wrap our planet in waves of love that

serve to cherish our Heaven granted lives This is the message from water When Matter Became Mind Dana Xavier Kerola,2025-08-25 This book is a scientific story that chronicles the origin and evolution of the mutually connected physical and mental aspects of our universe This work examines in an engaging way two of the greatest mysteries in all of science and philosophy the origin of the universe itself and the nature of human consciousness The author invites the reader to travel with him mentally to ponder the deep question Why is there something rather than nothing The author infuses memories of events in his own life to showcase the marvelous magic of human memory The book also reveals the sheer power of rational thought embodied in great achievements by the likes of Georg Cantor with his proof of distinct levels of mathematical infinity and Kurt G del in the formulation of his Incompleteness Theorems that lie at the root of our ability to gain absolute knowledge about the universe This educationally entertaining work will appeal to a broad spectrum of readers from scientist authors and educators to anyone who is seeking to discover a new cosmic perspective they each might adopt for themselves
