

In spite of the fundamental role that it has played in world history from the colonial period onwards, Kalim Siddiqui argues that advanced capitalism has no response to the key challenges of our times.

DEEPENING ECONOMIC CRISIS IN **ADVANCED CAPITALISM**

by Dr Kalim Siddiqui

I. INTRODUCTION

In recent years, long-term economic growth has fallen in all major advanced economies, which is referred to as “secular stagnation” by mainstream economists. The 2008 financial crisis was largely due to the policy of a new regime of accumulation such as neoliberalism, globalisation,

or financialisation. The main factors in deepening crises in the advanced capitalist economies lie in the long historical process that began in 1973, soon after the Israel-Arab war, which culminated by ending the longest “Golden Period” in the history of capitalism (1945-72), i.e. post-war expansion, when unemployment levels were low, and also poverty and inequalities were dramatically reduced in all major advanced capitalist countries.

The “Golden Period” of capitalism, when advanced capitalism had a steady upward growth for a quarter of a century, had no such precedent in the past. This steady growth took

The Deepening Crisis Of Us Capitalism:

Deepening Crisis Harry Magdoff, Paul Marlor Sweezy, 1981 Response to financial meltdown is entangled with basic challenges to global governance Environment global security and ethnicity and nationalism are all global issues today Focusing on the political and social dimensions of the crisis contributors examine changes in relationships between the world's richer and poorer countries efforts to strengthen global institutions and difficulties facing states trying to create stability for their citizens

Capitalism's Crisis Deepens Richard D. Wolff, 2016-05-30 The leading socialist economist in the country explores the roots of the Great Recession and its immense impact on working people Cornel West While most mainstream commentators view the crisis that provoked the Great Recession as having passed these essays from Richard Wolff paint a far less rosy picture Drawing attention to the extreme downturn in most of capitalism's old centers the unequal growth in its new centers and the resurgence of a global speculative bubble Wolff in his uniquely accessible style makes the case that the crisis should be grasped not as a passing moment but as an evolving stage in capitalism's history Praise for Richard Wolff and *Democracy at Work* Probably America's most prominent Marxist economist The New York Times Magazine Richard Wolff's constructive and innovative ideas suggest new and promising foundations for much more authentic democracy and sustainable and equitable development ideas that can be implemented directly and carried forward A very valuable contribution in troubled times Noam Chomsky Wolff offers a rich and much needed corrective to the views of mainstream economists and pundits It would be difficult to come away from this with anything but an acute appreciation of what is needed to get us out of this mess Stanley Aronowitz Bold thoughtful transformative a powerful and challenging vision that takes us beyond both corporate capitalism and state socialism Richard Wolff at his best Gar Alperovitz

The Endless Crisis John Bellamy Foster, Robert W. McChesney, 2017-05-01 The days of boom and bubble are over and the time has come to understand the long term economic reality Although the Great Recession officially ended in June 2009 hopes for a new phase of rapid economic expansion were quickly dashed Instead growth has been slow unemployment has remained high wages and benefits have seen little improvement poverty has increased and the trend toward more inequality of incomes and wealth has continued It appears that the Great Recession has given way to a period of long term anemic growth which Foster and McChesney aptly term the Great Stagnation This incisive and timely book traces the origins of economic stagnation and explains what it means for a clear understanding of our current situation The authors point out that increasing monopolization of the economy when a handful of large firms dominate one or several industries leads to an over abundance of capital and too few profitable investment opportunities with economic stagnation as the result Absent powerful stimuli to investment such as historic innovations like the automobile or major government spending modern capitalist economies have become increasingly dependent on the financial sector to realize profits And while financialization may have provided a temporary respite from stagnation it is a solution that cannot last indefinitely as instability in financial markets over the last

level this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008-2009. Through a careful examination of the origin, development, and aftermath of the catastrophic economic crisis from which the world is still trying to recover, editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact, felt most severely by working people around the world. Ultimately, this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society.

Empire or Republic? James Petras, Morris Morley, 2012-11-12. Empire or Republic makes the necessary but much overlooked link between our nation's international policies and the domestic situation.
