

THE HISTORY OF ART EDUCATION:

Proceedings from the Second Penn State Conference, 1989

THE NATIONAL ART EDUCATION ASSOCIATION

The History Of Art Education Proceedings From The Second Penn State Conference 1989

Rachel Mason, Doug Boughton

The History Of Art Education Proceedings From The Second Penn State Conference 1989:

International Handbook of Research in Arts Education Liora Bresler, 2007-09-04 Providing a distillation of knowledge in the various disciplines of arts education dance drama music literature and poetry and visual arts the Handbook synthesizes existing research literature helps define the past and contributes to shaping the substantive and methodological future of the respective and integrated disciplines of arts education While research can at times seem distant from practice the Handbook aims to maintain connection with the lived practice of art and of education capturing the vibrancy and best thinking in the field of theory and practice The Handbook is organized into 13 sections each centering on a major area or issue in arts education research These areas include History of arts education curriculum evaluation cultural centers appreciation composition informal learning child culture creativity the body spirituality and technology The individual chapters address cross cultural research related to the central theme of the section from the perspectives of the particular arts discipline Interludes provide reflective thoughts on the theme [The History of Art Education](#) Patricia Marie Amburgy, 1992

Handbook of Research and Policy in Art Education Elliot W. Eisner, Michael D. Day, 2004-04-12 This work provides an overview of the progress that has characterized the field of research and policy in art education It profiles and integrates history policy learning curriculum and instruction assessment and competing perspectives

Why Art Cannot Be Taught James Elkins, 2001-05-17 In this smart survival guide for students and teachers the only book of its kind James Elkins examines the curious endeavor to teach the unteachable that is generally known as college level art instruction This singular project is organized around a series of conflicting claims about art Art can be taught but nobody knows quite how Art can be taught but it seems as if it can't be since so few students become outstanding artists Art cannot be taught but it can be fostered or helped along Art cannot be taught or even nourished but it is possible to teach right up to the beginnings of art so that students are ready to make art the moment they graduate Great art cannot be taught but more run of the mill art can be Elkins traces the development or invention of the modern art school and considers how issues such as the question of core curriculum and the intellectual isolation of art schools affect the teaching and learning of art He also addresses the phenomenon of art critiques as a microcosm for teaching art as a whole and dissects real life critiques highlighting presuppositions and dynamics that make them confusing and suggesting ways to make them more helpful Elkins's no nonsense approach clears away the assumptions about art instruction that are not borne out by classroom practice For example he notes that despite much talk about instilling visual acuity and teaching technique in practice neither teachers nor students behave as if those were their principal goals He addresses the absurdity of pretending that sexual issues are absent from life drawing classes and questions the practice of holding up great masters and masterpieces as models for students capable of producing only mediocre art He also discusses types of art including art that takes time to complete and art that isn't serious that cannot be learned in studio art classes Why Art Cannot Be Taught is a response to Elkins's observation that

we know very little about what we do in the art classroom His incisive commentary illuminates the experience of learning art for those involved in it while opening an intriguing window for those outside the discipline

Learning in and Through Art Stephen M. Dobbs, 1998 This Handbook provides a practical straightforward guide to the theory and practice of discipline based art education This comprehensive approach to art education has transformed the way students create and understand art it also offers opportunities for relating art to other subjects as well as to the personal interests and abilities of young learners This completely revised edition explains how DBAE draws content from the disciplines of art making art criticism art history and aesthetics and shows how the practice of DBAE in schools over the past several years has influenced how art is taught today

The History of American Art Education Peter Smith, 1996-07-22 The ideas people and events that developed art education are described and analyzed so that art educators and educators in general will have a better understanding of what has happened and is happening to visual art in the schools Peter Smith raises the issue of art education s inordinate emphasis on Eurocentric art He challenges the often expressed notion that the field of education is the cause of art education s problems and proposes that confused conceptions within the art world are just as much a root of the difficulty No other book in art education history gives such close and analytical attention to the careers of women in the field The materials on Germanic cultural and historical influences are unequalled as is the scholarly treatment of Viktor Lowenfeld probably the most influential single figure in 20th century American art education

Colonized Through Art Marinella Lentis, 2017 Colonized through Art explores how the federal government used art education for American Indian children as an instrument for the colonization of consciousness hoping to instill the values and ideals of Western society while simultaneously maintaining a political social economic and racial hierarchy Focusing on the Albuquerque Indian School in New Mexico the Sherman Institute in Riverside California and the world s fairs and local community exhibitions Marinella Lentis examines how the U S government s solution to the Indian problem at the end of the nineteenth century emphasized education and assimilation Educational theories at the time viewed art as the foundation of morality and as a way to promote virtues and personal improvement These theories made the subject of art a natural tool for policy makers and educators to use in achieving their assimilationist goals of turning student savages into civilized men and women Despite such educational regimes for students however indigenous ideas about art oftentimes emerged from below particularly from well known art teachers such as Arizona Swayney and Angel DeCora Colonized through Art explores how American Indian schools taught children to abandon their cultural heritage and produce artificially native crafts that were exhibited at local and international fairs The purchase of these crafts by the general public turned students work into commodities and schools into factories

Beyond Multicultural Art Education Rachel Mason, Doug Boughton, 1999 Multiculturalism is a term that has been much used in educational texts in recent years Its usage is frequently taken for granted in the rhetoric of curriculum literature However it has recently become clear that there are significant variations of interpretations of multiculturalism in different

world regions This book takes a new and deeper look at the notion of multiculturalism through the lens of art education In educational terms art is a unique tool for the investigation of cultural values because it transcends the barrier of language and provides visceral and tacit insights into cultural change In order to address the educational interpretations and methods of implementing multiculturalism in different regions of the world this book contains discussion and analysis of perspectives on art education theory and practice from thirteen countries The authors of each chapter are respected multicultural experts in their geographic locations who are well equipped to provide unique insights into the particular issues of multiculturalism viewed from the perspective of art in educational contexts The book as a whole provides tools for the conceptual analysis of contemporary notions linked with multiculturalism such as interculturalism internationalism and globalisation It also provides strategies for art teaching in relation to these ideas While the term multicultural education is problematic this book presents conceptual frameworks that should assist educators to examine their own teaching on issues of equity and diversity that are central to the multicultural education debate

The Federal Art Project and the Creation of Middlebrow Culture
Victoria Grieve, 2009 Art for everyone the Federal Art Project's drive for middlebrow visual culture and identity

Designing the Creative Child Amy F. Ogata, 2013-04-21 The postwar American stereotypes of suburban sameness traditional gender roles and educational conservatism have masked an alternate self image tailor made for the Cold War The creative child an idealized future citizen was the darling of baby boom parents psychologists marketers and designers who saw in the next generation promise that appeared to answer the most pressing worries of the age Designing the Creative Child reveals how a postwar cult of childhood creativity developed and continues to this day Exploring how the idea of children as imaginative and naturally creative was constructed disseminated and consumed in the United States after World War II Amy F Ogata argues that educational toys playgrounds small middle class houses new schools and children's museums were designed to cultivate imagination in a growing cohort of baby boom children Enthusiasm for encouraging creativity in children countered Cold War fears of failing competitiveness and the postwar critique of social conformity making creativity an emblem of national revitalization Ogata describes how a historically rooted belief in children's capacity for independent thinking was transformed from an elite concern of the interwar years to a fully consumable and aspirational ideal that persists today From building blocks to Gumby playhouses to Playskool trains Creative Playthings to the Eames House of Cards Crayola fingerpaint to children's museums material goods and spaces shaped a popular understanding of creativity and Designing the Creative Child demonstrates how this notion has been woven into the fabric of American culture

This is likewise one of the factors by obtaining the soft documents of this **The History Of Art Education Proceedings From The Second Penn State Conference 1989** by online. You might not require more era to spend to go to the books foundation as well as search for them. In some cases, you likewise reach not discover the statement The History Of Art Education Proceedings From The Second Penn State Conference 1989 that you are looking for. It will enormously squander the time.

However below, later you visit this web page, it will be suitably very simple to get as competently as download guide The History Of Art Education Proceedings From The Second Penn State Conference 1989

It will not receive many grow old as we run by before. You can reach it though enactment something else at home and even in your workplace. appropriately easy! So, are you question?
