History of Western Art Denise Hooker, 1994 Examines the history of Western art from Greek art to Post Modernism

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and

revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

A History of Western Art Laurie Schneider Adams, 2010-10-15 Appropriate for one semester art history surveys or historically focused art appreciation classes A History of Western Art Fifth Edition combines sound scholarship lavish visuals and a lively narrative to provide students with an accessible and engaging introduction to art history Focusing on the Western canon the text presents a compelling chronological narrative from prehistory to the present A non Western supplement World Views Topics in Non Western Art addresses specific areas of non Western art and augments the Western chronology by illustrating moments of thematic relationships and cross cultural contact

A New History of Western Art Koenraad Jonckheere, 2022-10-15 A radical re examination of 2 500 years of European art deconstructing and demystifying its long history from ancient to present How has art evolved from the pursuit of the ideal human form to a black square on a white canvas Why is a banana duct taped to a wall worth more on the art market than a beautiful seventeenth century landscape By taking art for what it actually is a piece of stone or wood a sheet of paper with some lines drawn on it a painted canvas this lively and accessible account shows how seemingly meaningless objects can be transformed into celebrated works of art Breaking with conventional notions of artistic genius Koenraad Jonckheere explores how stories and emotions give meaning to objects and why changing historical circumstances result in such shifting opinions over time Tracing its story from ancient times to present A New History of Western Art reframes the evolution of European art and radically reshapes our understanding of art history Published in association with Hannibal Books

Eugene Kleinbauer, Medieval Academy of America, 1989-01-01 A collection of essays that reflect the breadth of twentieth century scholarship in art history Kleinbauer has sought to illustrate the variety of methods scholars have developed for conveying the unfolding of the arts in the Western world Originally published by Holt
