Regions and Designed Landscapes in Georgian England Sarah Spooner,2015-06-26 Garden design evolved hugely during the Georgian period as symbols of wealth and stature the landed aristocracy had been using gardens for decades Yet during the eighteenth century society began to homogenise and the urban elite also started demanding landscapes that would reflect their positions The gardens of the aristocracy and the gentry were different in appearance use and meaning despite broad similarities in form Underlying this was the importance of place of the landscape itself and its raw material Contemporaries often referred to the need to consult the genius of the place when creating a new designed landscape as the place where the garden was located was critical in determining its appearance Genius loci soil type topography water supply all influenced landscape design in this period The approach taken in this book blends landscape and garden history to make new insights into landscape and design in the eighteenth century Spooner s own research presents little known sites alongside those which are more well known and explores the complexity of the story of landscape design in the Georgian period which is usually oversimplified and reduced to the story of a few great men Urban and Regional Development Trajectories in Contemporary Capitalism Flavia Martinelli, Frank Moulaert, Andreas Novy,2013-03-22 This book re evaluates a rich scientific heritage of space and history sensitive development theories and produces an integrated methodology for the comparative analysis of urban and regional trajectories within a globalized world The main argument put forward is that current mainstream analyses of urban and regional development have forgotten this rich heritage and fail to address the connections between different dimensions of development the role of history and the importance of place and scale relations The proposed methodology integrates elements from different theories radical economic geography regulation approach cultural political economy old and new institutionalism that all share a strong concern with time and space dynamics They are recombined into an interdisciplinary meta theoretical framework capable of articulating the overall problem of socio economic development and providing methodological anchors for comparative case study analysis while recognizing context specificities The analytical methodology focuses on key dynamics and relations such as strategic agency and collective action institutions and structures culture and discourse as well as the tension between path dependency and path shaping The

methodology is then applied to eight urban and regional cases mostly from Western Europe but also from the United States and China. The case studies confirm the relevance of time and space sensitive analysis not only for understanding development trajectories but also for policy making. They ultimately highlight that while post war institutions were able to address systemic contradictions and foster a relatively inclusive development model, the neoliberal turn has led to reductionist policies that not only have resulted in an increase in social and spatial inequalities but have also undermined growth and democracy.

'Whither regional studies?' Andy Pike, 2013-09-13. Regional studies are at a vibrant conjuncture. Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic, social, political, cultural, and ecological change. In the context of increased interest in inter and multi disciplinary approaches, regions remain an arena in which synthesis across disciplines, economics, geography, planning, politics, and sociology can take place. Yet recent work has raised fundamental questions about how we think about and research regions and regional change, development, governance, and regulation. First, emergent conceptual ideas have introduced new thinking about space, place, and scale that interprets regions as unbounded relational spaces. This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex, multi scalar approaches. Second, research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist, often quantitative and more theoretically diverse, typically qualitative approaches. Last, regional governance, policy, and politics are wrestling with the conceptual, methodological, and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures. This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates. While we are at an early stage in beginning to think through what such conceptual, theoretical, methodological, governance, policy, and political innovations and developments mean for regional studies, the magnitude and resonance of such issues underpin the vitality of research on the region. This book was published as a special issue of *Regional Studies*.

Sex Before the Sexual Revolution Simon Szreter, Kate Fisher, 2010-10-14 What did sex mean for ordinary people before the sexual revolution of the 1960s and 1970s who were often pitied by later generations as repressed unfulfilled and full of moral anxiety This book provides the first rounded first hand account of sexuality in marriage in the early and mid twentieth century These award winning authors look beyond conventions of silence among the respectable majority to challenge stereotypes of ignorance and inhibition Based on vivid compelling and frank testimonies from a socially and geographically diverse range of individuals the book explores a spectrum of sexual experiences from learning about sex and sexual practices in courtship to attitudes to the body marital ideals and birth control It demonstrates that while the era s emphasis on silence and strict moral codes could for some be a source of inhibition and dissatisfaction for many the culture of privacy and innocence was central to fulfilling and pleasurable intimate lives
