The Homeric Epics:

The Homeric Epics and the Gospel of Mark Dennis Ronald MacDonald, Professor of New Testament and Christian Origins Dennis R MacDonald, 2000-01-01 In this groundbreaking book Dennis R MacDonald offers an entirely new view of the New Testament gospel of Mark The author of the earliest gospel was not writing history nor was he merely recording tradition MacDonald argues Close reading and careful analysis show that Mark borrowed extensively from the Odyssey and the Iliad and that he wanted his readers to recognise the Homeric antecedents in Mark's story of Jesus Mark was composing a prose anti epic MacDonald says presenting Jesus as a suffering hero modeled after but far superior to traditional Greek heroes Much like Odysseus Mark's Jesus sails the seas with uncomprehending companions encounters preternatural opponents and suffers many things before confronting rivals who have made his house a den of thieves In his death and burial Jesus emulates Hector although unlike Hector Jesus leaves his tomb empty Mark's minor characters too recall Homeric predecessors Bartimaeus emulates Tiresias Joseph of Arimathea Priam and the women at the tomb Helen Hecuba and Andromache And entire episodes in Mark mirror Homeric episodes including stilling the sea walking on water feeding the multitudes the Triumphal E

The Homeric Epics and the Chinese Book of Songs Fritz-Heiner Mutschler, 2018-12-19 The Homeric epics and the Book of Songs are not just the fountainheads of the Western and Chinese literary traditions for centuries they played a central role in education and communal life and thus exercised a lasting influence on both civilizations This volume presents the first systematic comparison of the two corpora Part One analyzes their genesis and their reception while Part Two discusses their characteristics as poetic creations The book brings together Chinese and Western sinologists and classicists and so promotes significant interdisciplinary and intercultural dialogue Though the contributors rank among the leading experts in their fields the essays here are accessible not only to their peers but also to the interested general reader and so to all those who seek a deeper understanding of Chinese and Western civilizations their common human basis and their characteristic differences

The Homeric Epics Constantine Athanasius Trypanis, 1977 This book presents a broad but concise view of the basic problems of the Homeric Epics as seen by modern scholars It looks at the history of Homeric scholarship from the Alexandrian period and presents a lucid analysis of the main features of the poem The copious notes and up to date bibliography make it a basic work for the student of Greek literature and an invaluable companion guide for all lovers of Homer's epics

Folk Tale, Fiction and Saga in the Homeric Epics Rhys Carpenter, 1946 The Iliad, the Odyssey, and the Epic Tradition Charles Rowan Beye, 1966 Research into the Homeric epics has considerably enlarged our understanding of the Iliad and the Odyssey and the cultures that produced them The two poems have been studied from every point of view by specialists in a variety of disciplines Out of this material the author has attempted to draw information that is relevant to any critical understanding of the Iliad and the Odyssey as poetry Therefore the author has tried to give some account of the nature of oral poetry to help the reader formulate an aesthetic different from

that which he would employ for literate poetry Moreover the author has discussed some of the common techniques of oral epic narration so that the reader may more easily notice when Homer is using these often routine devices for effects that are especially pertinent to his poem From preface

Science and Technology in Homeric Epics S. A. Paipetis, 2008-10-22 In the Homeric Epics important references to specific autonomous systems and mechanisms of very advanced technology such as automata and artificial intelligence as well as to almost modern methods of design and production are included Even if those features of Homeric science were just poetic concepts which on many occasions does not explain the astonishing details of design and manufacture like the ones included in the present volume they seem to prove that these achievements were well within human capability In addition the substantial development of machine theory during the early post Homeric age shows that the Homeric descriptions were a kind of prophetic conception of these machines and scientific research must be a quest for the fundamental principles of knowledge available during the Late Bronze Age and the dawn of the Iron Age Such investigations must of necessity be strongly interdisciplinary and also proceed continuously in time since as science progresses new elements of knowledge are discovered in the Homeric Epics amenable to scientific analysis This book brings together papers presented at the international symposium Science and Technology in Homeric Epics which took place at Ancient Olympia in 2006 It includes a total of 41 contributions mostly original research papers covering diverse fields of science and technology in the modern sense of these words

Device and Composition in the Greek Epic Cycle Benjamin Sammons, 2017-06-22 Benjamin Sammons argues that the poems of the so called Epic Cycle were constructed using the same traditional devices as the Homeric epics From this insight he sheds new light on the overall form of these lost poems and offers fresh interpretation of the few remaining fragments

Orality, Textuality, and the Homeric Epics Jonathan L. Ready, 2019-07-30 Written texts of the Iliad and the Odyssey achieved an unprecedented degree of standardization after 150 BCE but what about Homeric texts prior to the emergence of standardized written texts Orality Textuality and the Homeric Epics sheds light on that earlier history by drawing on scholarship from outside the discipline of classical studies to query from three different angles what it means to speak of Homeric poetry together with the word text Part I utilizes work in linguistic anthropology on oral texts and oral intertextuality to illuminate both the verbal and oratorical landscapes our Homeric poets fashion in their epics and what the poets were striving to do when they performed Looking to folkloristics part II examines modern instances of the textualization of an oral traditional work in order to reconstruct the creation of written versions of the Homeric poems through a process that began with a poet dictating to a scribe Combining research into scribal activity in other cultures especially in the fields of religious studies and medieval studies with research into performance in the field of linguistic anthropology part III investigates some of the earliest extant texts of the Homeric epics the so called wild papyri By looking at oral texts dictated texts and wild texts this volume traces the intricate history of Homeric texts from the Archaic to the Hellenistic period long before the emergence of standardized written texts in a

comparative and interdisciplinary study that will benefit researchers in a number of disciplines across the humanities

Deep Agroecology and the Homeric Epics John W. Head, 2020-12-15 Drawing on the Homeric epics this multidisciplinary work reveals the cultural transformations which need to take place in order to transition from today's modern extractive agricultural system to a sustainable natural systems agriculture. In order to provide an imaginative foundation on which to build such a cultural transformation the author draws on the oldest and most pervasive pair of literary works in the Western canon the Iliad and the Odyssey. He uses themes from those foundational literary works to critique the concept of state sovereignty and to explain how innovative federalism structures around the world already show momentum building toward changes in global environmental governance. The book proposes a dramatic expansion on those innovations to create eco states responsible for agroecological management. Drawing from many years of experience in international institutions the author proposes a system of coordination by which an international agroecology focused organization would simultaneously i avoid the shortcomings of the world's current family of powerful global institutions and ii help create and implement a reformed system of local landscape based agriculture wholly consistent with ecological principles. Acknowledging the difficulty of achieving reforms such as these the author suggests that a new cultural conceptual narrative can be constructed drawing on values set forth 2 700 years ago in the Homeric epics. He explains how these values can be reimagined to drive forward our efforts in addressing today's climate and agricultural crises in ways that reflect not reject the natural processes and relationships that make the Earth a living planet. This book will be of great interest to students academics and policymakers addressing issues of agrarian values environmental and agricultural law environmental restoration agroecology and global institutional reform.
