Issues 69-1 Through 69-50 [January-December 1969]. ,1970 *Accidental Injury* Alan M. Nahum, John W. Melvin, 2013-03-09 Writing on accidental injury often seems to occur from one of two perspectives One perspective is that of those involved in aspects of injury diagnosis and treatment and the other is that of those in the engineering and biologic sciences who discuss mechanical principles and simulations From our point of view significant information problems exist at the interface Persons in the business of diagnosis and treatment do not know how to access use and evaluate theoretical information that does not have obvious practical applications persons on the theoretical side do not have enough real life field data with which to identify problems or to evaluate solutions The ideal system provides a constant two way flow of data that permits continuous problem identification and course correction This book attempts to provide a state of the art look at the applied biomechanics of accidental injury causation and prevention The authors are recognized authorities in their specialized fields It is hoped that this book will stimulate more applied research in the field of accidental injury causation and prevention Alan M Nahum John W Melvin vii Contents Preface vii Contributors xi Chapter 1 The Application of Biomechanics to the Understanding of Injury and Healing 1 Y C Fung Chapter 2 Instrumentation in Experimental Design 12 Warren N Hardy Chapter 3 The Use of Public Crash Data in Biomechanical Research 49 Charles P Compton Chapter 4 Anthropomorphic Test Devices 66 Harold J Mertz Chapter 5 Radiologic Analysis of Trauma 85
