Truth Sean Cubitt, 2023-09-19 Ecologies of truth in a post truth era The problem with Neo Nazis is not that they don't trust the media but that they trust them too much White supremacists are absolutely convinced by their supremacy They distrust technologies and climate change as much as the global poor because as white Europeans they believe they are exempt from exploitation This book argues that the only truths possible in the 21st century are mobile inventive practices involving everything European models of communication exclude technologies nature and leftover humanity Tracing histories of their separation Truth analyzes the struggle between the new dominance of information systems and the sensory worlds it excludes not least the ancestral wisdom that the West has imprisoned in its technologies The emergent cybernetics of the 1940s has become the dominant ideology of the 21st century Truth opposes its division of the world between subjects and objects signals and noise emphasizing that there can be no return to some primal Eden of unfettered exchange Instead these divisions which have fundamentally reorganized the commodity form that they inherited are the historical conditions we must confront Drawing on a wide range of aesthetic practices from literature film art music workplace media scientific instruments and animal displays Truth seeks out ways to create a new commons and a new politics grounded in aesthetic properties of creativity senses and perception that can no longer be restricted to humans alone
