The Historian Between The Ethnologist The Futurologist:

The historian between the ethnologist and the futurologist Jérôme [Ed.] Dumoulin, Conference on the Historian Between the Ethnologist and the Futurologist 1971, 2018-12-03 No detailed description available for The historian between the ethnologist and the futurologist

In the Workshop of History François Furet, 1984-12 Those concerned with the practice of history as a discipline and as an intellectual activity will be intrigued by the view of history that François Furet offers in this collection of essays After twenty five years as a professional historian at the Ecole des Hautes Etudes and in the ranks of the Annales school Furet sets out to reexamine the methodological and intellectual cleavages that exist today among historians Furet views history as a field bounded at each end by two ideal types One end is concerned with the history of periods and with the empiricism of facts rather than received ideas At the other end is problem oriented history which substitutes for the supposed coherence of a period the analytical examination of a question Furet's own work leans toward the second more conceptually oriented kind of historiography The essays in this volume most of them never before published in English illustrate the breadth of his approach Furet's discussion ranges through Tocqueville's conceptual system to present day America from the origins of history in France to the Jewish experience in the late twentieth century Among Furet's recurrent themes is the contention that the historian constructs the object or field of his research rather than receiving it from the past

Annales Stuart Clark, 1999 This collection reprints key articles written within the past 30 years on the Annales school their journal their influence on history historiography and other academic fields

Anthropological Conversations Caroline B. Brettell, 2014-10-23 Cultural anthropologists can be an intellectually adventurous crowd open even eager to building bridges across disciplines in the name of understanding human behavior and the human experience more broadly In this first of its kind book Caroline Brettell explores the cross disciplinary conversations that have engaged cultural anthropologists both past and present Brettell highlights a handful of conversations between the discipline of anthropology on the one hand and history geography literature biology psychology and demography on the other She also pinpoints how these exchanges address three enduring issues of anthropological concern the temporal and the spatial dimensions of human experience the scientific and the humanistic dimensions of the anthropological enterprise and the individual and the group population as units of analysis in research *Anthropological Conversations* offers detailed accounts of particular ethnographic methodologies and findings and the theoretical trends informing them as a means of grasping the big picture issues Brettell clearly shows that by engaging with other fields cultural anthropologists have been able to think more deeply about what they mean by culture through this book she invites readers to continue the conversation

The Future of the World Jenny Andersson, 2018-07-25 The Future of the World is devoted to the intriguing field of study which emerged after World War Two futurism or futurology Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world Futurists were a motley crew of Cold War warriors nuclear scientists journalists and peace activists Some argued it should be a closed sphere of science defined by delimited probabilities They were challenged by alternative notions of the future as a potentially open realm Futurism also drew on an eclectic range of repertoires some of which were deduced from positivist social science mathematics and nuclear physics and some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists
