Three million telephones are now scattered abroad in foreign countries and seven millions are massed here in the land of its birth So entirely has the telephone outgrown the ridicule with which as many people can well remember it was first received that it is now in most places taken for granted as though it were a part of the natural phenomena of this planet It has so marvellously extended the facilities of conversation that art in which a man has all mankind for competitors that it is now an indispensable help to whoever would live the convenient life The disadvantage of being deaf and dumb to all absent persons which was universal in pre telephonic days has now happily been overcome and I hope that this story of how and by whom it was done will be a welcome addition to American libraries From the Preface Must greatly interest all telephone men

Electrical Review A popular non scientific history of the telephone written in an entertaining and dramatic style Journal of the Military Service Institution of the United States Wonderfully interesting Mr Casson has once again demonstrated his ability to take the historical facts connected with a more or less abstruse mechanical subject and weave them into a story of absorbing interest The history of the telephone which was invented by Alexander Graham Bell at time well within the memory of many of the readers of this magazine embodies a series of events many of them spectacular many of them romantic which go into the making of a book which to use a common expression reads like a novel Recounts the early difficulties in making the telephone a commercial proposition tells of the brilliant men who took up its cause perfected it financed it and added the business brains the beginnings of long distance telephony the development of the art down to the present time All along the story is told in the same simple entertaining style which characterizes the opening paragraphs
