Rubble Jeff Byles, 2007-12-18 From the straight boulevards that smashed their way through rambling old Paris to create the city we know today to the televised implosion of Las Vegas casinos to make room for America's ever grander desert of dreams demolition has long played an ambiguous role in our lives In lively colorful prose Rubble rides the wrecking ball through key episodes in the world of demolition Stretching over more than five hundred years of razing and toppling this story looks back to London's Great Fire of 1666 where self deputized wreckers artfully blew houses apart with barrels of gunpowder to halt the furious blaze and spotlights the advent of dynamite courtesy of demolition's patron saint Alfred Nobel that would later fuel epochal feats of unbuilding such as the implosion of the infamous Pruitt Igoe housing complex in St Louis Rubble also delves beyond these bravura blasts to survey the world jarring invention of the wrecking ball the oddly stirring ruin of New York's old Pennsylvania Station that potent symbol of the wrecker run amok and the ever busy bulldozers in places as diverse as Detroit Berlin and the British countryside Rich with stories of demolition's quirky impresarios including Mark Loizeaux the world famous engineer of destruction who brought Seattle's Kingdome to the ground in mere seconds this account makes first hand forays to implosion sites and digs extensively into wrecking's little known historical record Rubble is also an exploration of what happens when buildings fall when monuments topple into memory and when destructive creativity tears down to build again It unearths the world of demolition for the first time and along the way throws a penetrating light on the role that

destruction must play in our lives as a necessary prelude to renewal Told with arresting detail and energy this tale goes to the heart of the scientific social economic and personal meaning of how we unbuild our world Rubble is the first ever biography of the wrecking trade a riveting character filled narrative of how the black art of demolition grew to become a multibillion dollar business an extreme spectator sport and a touchstone for what we value what we disdain who we were and what we wish to become Vegas: From Fremont to the Strip - How Las Vegas Casinos Evolved. Above Them All: The Story of the Landmark Hotel & Casino Marc Wagner, 2018-11-20 The Landmark Hotel Casino was considered by many to be an eyesore and a failure before it was even completed Developer Frank Carroll s dream struggled to become reality through seven years of stop and go construction Money problems and legal disputes plagued the Landmark throughout its construction as well as its entire operational life A string of owners including the eccentric Howard Hughes struggled to make the Las Vegas property a success but fate refused to roll the dice in their favor Filled with rare photos interviews with employees and backed by over a decade of research From its development and construction through its operational life to its twilight years of abandonment and eventual destruction to make room for a parking lot this is the story of the tower above them all in Las Vegas

Enduring Innocence Keller Easterling, 2007-09-28 How outlaw spatial products resorts information technology campuses retail chains golf courses and ports act as cunning pawns in global politics In Enduring Innocence Keller Easterling tells the stories of outlaw spatial products resorts information technology campuses retail chains golf courses ports and other hybrid spaces that exist outside normal constituencies and jurisdictions in difficult political situations around the world These spaces familiar commercial formulas of retail business and trade aspire to be worlds unto themselves self reflexive and innocent of politics But as Easterling shows in reality these enclaves can become political pawns and objects of contention Jurisdictionally ambiguous they are imbued with myths desires and symbolic capital Their hilarious and dangerous masquerades often mix quite easily with the cunning of political platforms Easterling argues that the study of such real estate cocktails provides vivid evidence of the market s weakness resilience or violence Enduring Innocence collects six stories of spatial products and their political predicaments cruise ship tourism in North Korea high tech agricultural formations in Spain which have reignited labor wars and piracy in the Mediterranean hyperbolic forms of sovereignty in commercial and spiritual organizations shared by gurus and golf celebrities automated global ports microwave urbanism in South Asian IT enclaves and a global industry of building demolition that suggests urban warfare These regimes of nonnational sovereignty writes Easterling move around the world like weather fronts she focuses not on their blending their global connectivity but on their segregation and the cultural collisions that ensue Enduring Innocence resists the dream of one globally legible world found in many architectural

discourses on globalization Instead Easterling's consideration of these segregated worlds provides new tools for practitioners sensitive to the political composition of urban landscapes *The Strip* Stefan Al, 2017-03-03 The transformations of the Strip from the fake Wild West to neon signs twenty stories high to starchitecture and how they mirror America itself The Las Vegas Strip has impersonated the Wild West with saloon doors and wagon wheels it has decked itself out in midcentury modern sleekness It has illuminated itself with twenty story high neon signs then junked them After that came Disney like theme parks featuring castles and pirates followed by replicas of Venetian canals New York skyscrapers and the Eiffel Tower It might be noted that forty two million people visited Las Vegas in 2015 ten million more than visited the real Paris More recently the Strip decided to get classy with casinos designed by famous architects and zillion dollar collections of art Las Vegas became the implosion capital of the world as developers driven by competition got rid of the old to make way for the new offering a non metaphorical definition of creative destruction In *The Strip* Stefan Al examines the many transformations of the Las Vegas Strip arguing that they mirror transformations in America itself The Strip is not as popularly supposed a display of architectural freaks but representative of architectural trends and a record of social cultural and economic change Al tells two parallel stories He describes the feverish competition of Las Vegas developers to build the snazziest most tourist grabbing casinos and resorts with a cast of characters including the mobster Bugsy Siegel the eccentric billionaire Howard Hughes and the would be political kingmaker Sheldon Adelson And he views the Strip in a larger social context showing that it has not only reflected trends but also magnified them and sometimes even initiated them Generously illustrated with stunning color images throughout *The Strip* traces the many metamorphoses of a city that offers a vivid projection of the American dream
