Transport of Animals Intended for Breeding, Production and Slaughter R. Moss, 2012-12-06 The transport of farm livestock was the subject of the seminar held from 7 8 July 1981 at the Commission of the European Communities CECl Directorate General for Agriculture Brussels as part of the work of the Division Coordinating Agricultural Research The aims of the seminar were to examine the knowledge available on how the physiology and behaviour of animals may change during transport to consider the significance of these changes in relation to welfare and economics and to assess those actions which as experimental projects or observational studies might be proposed to fill the most important gaps in our knowledge of the welfare of farm animals during transport A number of

conclusions can be drawn from the proceedings 1 Much knowledge is available from both scientific observations and practical experience which could be used to improve the transport of livestock Methods of loading the construction of vehicles ships crates and aircraft could benefit from the application of existing knowledge It is less clear whether it is best to concentrate on disseminating existing knowledge by education and advice or to contemplate more regulations 2 Losses by down grading at slaughter can largely be attributed to the ways in which animals are transported and handled Animals and the Law Jordan Curnutt,2001-11-02 Offers a comprehensive overview of the legislation and legal issues surrounding animals Written by Jordan Curnutt Animals and the Law covers everything from the Silver Spring monkeys subjects in the first U S lab raided by police where criminal charges were filed against a scientist conducting federally funded research to sex with animals Among the subjects reviewed are kosher and Halal food restrictions mad cow disease and cattle cannibalism animals in laboratories and as entertainment in circuses zoos rodeos horse racing cockfighting and more Also included are appendixes of animal organizations cases statutes and regulations and an extensive bibliography **Meat Animals, Production, Disposition, Income** ,1981 Protecting Animals Within and Across Borders Charlotte E. What is the meaning and value of natural food in a world reshaped by human activity What are the ethics of supporting harmful industries when less harmful alternatives are available What are the ethics of resisting harmful industries through activism advocacy and philanthropy The discussion ranges over cutting edge topics such as effective altruism abolition and regulation revolution and reform individual and structural change single issue and multi issue activism and legal and illegal activism This unique and accessible text is ideal for teachers students and anyone else interested in serious examination of one of the most complex and important moral problems of our time
