The Humanities After The War:

The Humanities After the War Wendell Lewis Willkie, 1969 *The Humanities After the War* Norman Foerster, 1944

The Humanities After the War, 1944 **American Higher Education Transformed, 1940-2005** Wilson

Smith, Thomas Bender, 2008-04-11 This long awaited sequel to Richard Hofstadter and Wilson Smith's classic anthology *American Higher Education A Documentary History* presents one hundred and seventy two key edited documents that record the transformation of higher education over the past sixty years The volume includes such seminal documents as Vannevar Bush's 1945 report to President Franklin D Roosevelt *Science the Endless Frontier* the U S Supreme Court decisions in *Brown v Board of Education* and *Sweezy v New Hampshire* and Adrienne Rich's challenging essay *Taking Women Students Seriously* The wide variety of readings underscores responses of higher education to a memorable often tumultuous half century Colleges and universities faced a transformation of their educational goals institutional structures and curricula and admission policies the ethnic and economic composition of student bodies an expanding social and gender membership in the professoriate their growing allegiance to and dependence on federal and foundation financial aids and even the definitions and defenses of academic freedom Wilson Smith and Thomas Bender have assembled an essential reference for policymakers administrators and all those interested in the history and sociology of higher education **Central and Eastern European**

Literary Theory and the West Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century but its relation to Western literary scholarship is complex This book sheds light on the entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations both official and informal encounters For the longest time however intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West A few literary theories nevertheless made it into Western scholarly discourses via exiled scholars Some of these scholars such as Mikhail Bakhtin become widely known in the West and their thought was transposed onto new Western cultural contexts others such as Olga Freidenberg were barely noticed outside of Russian and Poland This volume draws attention to the schools circles and concepts that shaped the development of theory in Central and Eastern Europe as well as the *histoire croisée* the history of translations transformations and migrations that conditioned its relationship with the West The Orientation of Science and Technology Shigeru Nakayama, 2009-02-26 One of the most distinguished

science historians of the twentieth century Shigeru Nakayama has been at the forefront of redirecting or reorientating conventional East Asian science and technology arguing like Joseph Needham that the orientation of science refers not only to the direction of science but also implies a turning to Eastern science In recent times he has been arguing for implementation of a Service Science which is linked to the rights and needs of mankind A survivor of the Hiroshima atomic

bomb he majored in astrophysics at the University of Tokyo and wrote on the history of astronomy for his PhD and later on the history of science for his Harvard PhD *Higher Education*, 1945 Educational Review Nicholas Murray Butler, Frank Pierrepont Graves, William McAndrew, 1919 Vols 19 34 include Bibliography of education for 1899 1906 compiled by James I Wyer and others The Administration of Correspondence-study Departments of Universities and Colleges Arthur Jay Klein, 1919 American Higher Education Since World War II Roger L. Geiger, 2021-05-25 Geiger provides an in depth history of the remarkable transformation of higher education in the United States in the decades after World War II taking readers from the GI Bill and the postwar expansion of higher education to the social upheaval of the 1960s and 1970s desegregation and coeducation and the challenges confronting American colleges today Shedding light on the tensions and triumphs of an era of rapid change the author shows how American universities emerged after the war as the world's most successful system for the advancement of knowledge how the pioneering of mass higher education led to the goal of higher education for all and how the selectivity sweepstakes for admission to the most elite schools has resulted in increased stratification today Geiger identifies 1980 as a turning point when the link between research and economic development stimulated a revival in academic research and the ascendancy of the modern research university that continues to the present Sweeping in scope this book demonstrates how growth has been the defining feature of modern higher education but how each generation since the war has pursued it for different reasons It provides the context we need to understand the complex issues facing our colleges and universities today from rising inequality and skyrocketing costs to deficiencies in student preparedness and lax educational standards From publisher description
