The Idea Of Social Science And Its Relation To Philosophy:

The Idea of a Social Science and Its Relation to Philosophy Peter Winch, 1990 This classic text attempts to locate the social sciences on the intellectual map utilizing the insights of Wittgenstein Includes a new preface by the author **The Idea of a Social Science and Its Relation to Philosophy** Peter Guy WINCH, 1958 Wittgenstein among the Sciences Rupert Read, Edited by Simon Summers, 2016-02-17 Engaging with the question of the extent to which the so called human economic or social sciences are actually sciences this book moves away from the search for a criterion or definition that will allow us to sharply distinguish the scientific from the non scientific Instead the book favours the pursuit of clarity with regard to the various enterprises undertaken by human beings with a view to dissolving the felt need for such a demarcation In other words Read pursues a therapeutic approach to the issue of the status and nature of these subjects Discussing the work of Kuhn Winch and Wittgenstein in relation to fundamental question of methodology Wittgenstein among the Sciences undertakes an examination of the nature of natural science itself in the light of which a series of successive cases of putatively scientific disciplines are analysed A novel and significant contribution to social science methodology and the philosophy of science and the human sciences this book will be of interest to social scientists and philosophers as well as to psychiatrists economists and cognitive scientists *Bernard Williams on Philosophy and History*, 2025-10-21 For Bernard Williams philosophy and history are importantly connected His work exploits this connection in a number of directions he believes that philosophy cannot ignore its own history the way science can that even when engaging with philosophy s history primarily to produce history one needs to draw on philosophy and that when doing the history of philosophy primarily to produce philosophy one still needs a sense of how historically distant past philosophers are because the point of reading them is to confront something different from the present But Williams also holds that systematic philosophy itself needs to be done historically engaging not just with its own history but with that of the concepts it seeks to understand To explore these different ways in which philosophy and history intertwine this volume assembles specially commissioned contributions by A W Moore Terence Irwin Sophie Grace Chappell Catherine Rowett Marcel van Ackeren John Cottingham Gerald Lang Lorenzo Greco Paul Russell Carla Bagnoli Peter Kail David Owen Giuseppina D Oro James Connelly Matthieu Queloz Nikhil Krishnan John Marenbon Ralph Wedgwood Garrett Cullity Hans Johann Glock Geraldine Ng Ilaria Cozzaglio Amanda R Greene and Miranda Fricker They critically appraise Williams s work in and on the history of philosophy as well as his historicist turn and his use of genealogy The collection uniquely combines substantive discussions of historical figures from Homer to Wittgenstein with methodological discussions of how and why the history of philosophy should be done and how and why philosophy should draw on history **Jihad for Jerusalem** M.A. Khan, 2004-10-30 Jihad for Jerusalem explores the agent structure dynamics in world politics and advances a constructivist theory of choice that explains the role of identity culture religion and other core values in international politics The struggle for Jerusalem by Iran Saudi Arabia Jordan and Israel is

the empirical space where the dynamics between reason and identity values and strategies is explored Jihad for Jerusalem advances a theory of agency in international politics This theory of agency is based on a reconstituted constructivist paradigm The theory is tested by an examination of the foreign policy decision making of Iran Israel Jordan and Saudi Arabia towards Israel from 1967 1997 The book uses the foreign policy of these states as cases to test the tension between religion and rationality between identity and reason between power and morality and advances a constructivist theory of choice that explains the importance of the role of culture religion identity and core values in international politics Anyone interested in international relations theory and the convoluted politics of the Middle East will find this book intriguing reading *Legal Theory and the Social Sciences* Maksymilian Del Mar, 2017-07-05 Ever since H L A Hart's self description of *The Concept of Law* as an exercise in descriptive sociology contemporary legal theorists have been debating the relationship between legal theory and sociology and between legal theory and social science more generally There have been some who have insisted on a clear divide between legal theory and the social sciences citing fundamental methodological differences Others have attempted to bridge gaps revealing common challenges and similar objects of inquiry Collecting the work of authors such as Martin Krygier David Nelken Brian Tamanaha Lewis Kornhauser Gunther Teubner and Nicola Lacey this volume the second in a three volume series provides an overview of the major developments in the last thirty years The volume is divided into three sections each discussing an aspect of the relationship of legal theory and the social sciences 1 methodological disputes and collaboration 2 common problems especially as they concern different modes of explanation of social behaviour and 3 common objects including most prominently the study of language in its social context and normative pluralism **There is No Such Thing as a Social Science** Phil Hutchinson, Rupert Read, Wes Sharrock, 2016-02-17 The death of Peter Winch in 1997 sparked a revived interest in his work with this book arguing his work suffered misrepresentation in both recent literature and in contemporary critiques of his writing Debates in philosophy and sociology about foundational questions of social ontology and methodology often claim to have adequately incorporated and moved beyond Winch's concerns Re establishing a Winchian voice the authors examine how such contentions involve a failure to understand central themes in Winch's writings and that the issues which occupied him in his *Idea of a Social Science and its Relation to Philosophy* and later papers remain central to social studies The volume offers a careful reading of the text in alliance with Wittgensteinian insights and alongside a focus on the nature and results of social thought and inquiry It draws parallels with other movements in the social studies notably ethnomethodology to demonstrate how Winch's central claim is both more significant and more difficult to transcend than sociologists and philosophers have hitherto imagined **Patterns of Thought in Africa and the West** Robin Horton, 1997-07-13 Robin Horton's critical and creative writings on African religious thought have influenced anthropologists philosophers and all those interested in the comparative study of religion and thought This selection of some of his classic papers with a new introduction and postscript by the author traces Horton's

theoretical ideas over thirty years In attempting to understand African religious thought he also tackles broader issues in the history and sociology of thought such as secularisation and modernisation Part I is a critical assessment of two established interpretive approaches the Symbolist and the Theological Part II proposes an alternative Intellectualist approach that emphasises the structural and processual similarities between religious and scientific thinking The postscript appraises the Intellectualist approach in the light of theorising about religion and world views **Historical Understanding and Ethics in Social Science** Leonidas Tsilipakos, 2025-03-14 Can social scientific description capture the historically individual Is the idea of an ethically committed social science morally defensible This book offers a critical historically grounded perspective on these perennial methodological and ethical problems in their current forms It provides a series of in depth examinations of recent work by prominent authors in sociology and philosophy The book draws on the thought of Peter Winch to provide a coherent response to the core issues that underlie past and present debate in social science and to provide a solid basis for future inquiry It will be of particular interest to social scientists philosophers and historians and to anyone seeking a clear grasp of the demands made by historical understanding and ethics on the study of society **Social Science** Gerard Delanty, 1997 It is argued that the conception of social science emerging today is one that involves a synthesis of radical constructivism and critical realism The crucial challenge facing social science is a question of its public role growing reflexivity in society has implications for the social production of knowledge and is bringing into question the separation of expert systems from other forms of knowledge
