The Idea Of The Labyrinth From Classical Antiquity Through The Middle Ages:

The Idea of the Labyrinth from Classical Antiquity through the Middle Ages Penelope Reed Doob, 2019-03-15

Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob. Their structure allows a double perspective: the baffling, fragmented prospect confronting the maze-treader within and the comprehensive vision available to those without. Mazes simultaneously assert order and chaos; artistry and confusion articulated clarity and bewildering complexity; perfected pattern and hesitant process. In this handsomely illustrated book, Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages. Doob first examines several complementary traditions of the maze topos, showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity, while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity. She then describes two common models of the labyrinth and explores their formal implications: the unicursal model with no false turnings, found almost universally in the visual arts, and the multicursal model with blind alleys and dead ends characteristic of literary texts. This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze. As Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests, she concludes with linked readings of four labyrinths of words: Virgil's *Aeneid*, Boethius' *Consolation of Philosophy*, Dante's *Divine Comedy*, and Chaucer's *House of Fame*, each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it. Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works. Readers in such fields as Classical literature, Medieval Studies, Renaissance Studies, comparative literature, literary theory, art history, and intellectual history will welcome this wide-ranging and illuminating book.

The Labyrinth Harold Bloom, Blake Hobby, 2009. In literature, labyrinths can represent many things: complication and difficulty, interconnectedness, creativity, and even literature itself. This new title discusses the role of the labyrinth in *The Garden of Forking Paths*, *Great Expectations*, *Ulysses*, and many others. *The Labyrinth* unravels this theme for literature students through 19 critical essays.

Travel, Time, and Space in the Middle Ages and Early Modern Time Albrecht Classen, 2018-10-22. Research on medieval and early modern travel literature has made great progress, which now allows us to take the next step and to analyze the correlations between the individual

and space throughout time which contributed essentially to identity formation in many different settings The contributors to this volume engage with a variety of pre modern texts images and other documents related to travel and the individual s self orientation in foreign lands and make an effort to determine the concept of identity within a spatial framework often determined by the meeting of various cultures Moreover objects images and words can also travel and connect people from different worlds through books The volume thus brings together new scholarship focused on the interrelationship of travel space time and individuality which also includes of course women s movement through the larger world whether in concrete terms or through proxy travel via readings Travel here is also examined with respect to craftsmen s activities at various sites artists employment for many different projects all over Europe and elsewhere and in terms of metaphysical experiences

catabasis *The Vatican to Vegas* Norman M. Klein, 2024-10-27 A guided tour through the nuanced politics of architectural illusion *The Vatican to Vegas* takes the reader from lavish Baroque fantasies of the seventeenth century to the Electronic Baroque of today The scripted spaces described by Norman M Klein are punctuated with devices widely used in special effects since 1500 shocks surprise twists grand fakes and copies Since its first publication 2004 *The Vatican To Vegas* has emerged as a classic across many fields from media and architecture to the fine arts and urban planning Its timing was ironic Klein assumed in 2004 that the future of scripted illusion was about to radically shift This new edition brings the ironic story up to the present and into the digitally overwhelmed scripted spaces of the future

After the Carolingians Beatrice Kitzinger, Joshua O'Driscoll, 2019-07-08 A volume that introduces new sources and offers fresh perspectives on a key era of transition this book is of value to art historians and historians alike From the dissolution of the Carolingian empire to the onset of the so called 12th century Renaissance the transformative 10th 11th centuries witnessed the production of a significant number of illuminated manuscripts from present day France Belgium Spain and Italy alongside the better known works from Anglo Saxon England and the Holy Roman Empire While the hybrid styles evident in book painting reflect the movement and re organization of people and codices many of the manuscripts also display a highly creative engagement with the art of the past Likewise their handling of subject matter whether common or new for book illumination attests to vibrant artistic energy and innovation On the basis of rarely studied scientific religious and literary manuscripts the contributions in this volume address a range of issues including the engagement of 10th 11th century bookmakers with their Carolingian and Antique legacies the interwoven geographies of book production and matters of modern politics and historiography that have shaped the study of this complex period

Tracing the Trails in the Medieval World Albrecht Classen, 2020-10-11 Every human being knows that we are walking through life following trails whether we are aware of them or not Medieval poets from the anonymous composer of *Beowulf* to Marie de France Hartmann von Aue Gottfried von Strassburg and Guillaume de Lorris to Petrarch and Heinrich Kaufringer predicated their works on the notion of the trail and elaborated on its epistemological function We can grasp here an essential concept that determines much of medieval and early modern

European literature and philosophy addressing the direction which all protagonists pursue as powerfully illustrated also by the anonymous poets of Herzog Ernst and Sir Gawain and the Green Knight Dante's *Divina Commedia* in fact proves to be one of the most explicit poetic manifestations of the fundamental idea of the trail but we find strong parallels also in powerful contemporary works such as Guillaume de Deguileville's *Plerinage de la vie humaine* and in many mystical tracts

The Spaces That Never Were in Early Modern Art Jelena Todorović, 2019-08-15 Throughout history the research of space has always been an issue of great interest Since classical Antiquity the physical space itself and its imperfect double the illusionary space used in the visual arts have been one of the perpetual obsessions of man However there are very few studies that question the reality of represented space and deal with those liminal phenomena that exist on the blurred boundary between reality and imagination Such spaces were never defined by carefully drawn borders they were usually outlined by the ephemeral and ever changing barriers For that very reason liminal spaces describe those curious worlds confined in gardens and collections they underpin all those dreams of ideal societies and construct visions of unobtainable and distant shores Liminal spaces are the territories not usually found on maps and in atlases they are not subjected to laws of perspective and elude the usual representations They are always beyond and behind the established depiction of space Often they possess yet another layer of signification that transforms a mere image of nature into a political manifesto the lines on precious stones into the shapes of vanished cities and private art collections into a dream of absolute power This book explores different representations and forms of liminal spaces that on the one hand deeply influenced the history of the early modern imagination and on the other established the models for our own understanding of liminal spatial phenomena

A Space of Anxiety Anne Fuchs, 2024-08-26 *A Space of Anxiety* engages with a body of German Jewish literature that from the beginning of the century onwards explores notions of identity and kinship in the context of migration exile and persecution The study offers an engaging analysis of how Freud Kafka Roth Drach and Hilsenrath employ to varying degrees the travel paradigm to question those borders and boundaries that define the space between the self and the other *A Space of Anxiety* argues that from Freud to Hilsenrath German Jewish literature emerges from an ambivalent space of enunciation which challenges the great narrative of an historical identity authenticated by an originary past Inspired by postcolonial and psychoanalytic theories the author shows that modern German Jewish writers inhabit a Third Space which poses an alternative to an understanding of culture as a homogeneous tradition based on national unity By endeavouring to explore this third space in examples of modern German Jewish literature the volume also aims to contribute to recent efforts to rewriting literary history In retracing the inherent ambivalence in how German Jewish literature situates itself in cultural discourse this study focuses on how this literature subverts received notions of identity and racial boundaries The study is of interest to students of German literature German Jewish literature and Cultural Studies

From Florence to the Heavenly City Claire E. Honess, 2017-07-05 Dante's political thought has long constituted a major area of interest for Dante studies yet

the poet's political views have traditionally been considered a self-contained area of study and viewed in isolation from the poet's other concerns. Consequently, the symbolic and poetic values which Dante attaches to political structures have been largely ignored or marginalised by Dante criticism. This omission is addressed here by Claire Honess whose study of Dante's poetry of citizenship focuses on more fundamental issues such as the relationship between the individual and the community, the question of what it means to be a citizen and above all the way in which notions of cities and citizenship enter the imagery and structure of the *Commedia*.
