Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

The Distorting Mirror Laikwan Pang, 2007-10-31 The Distorting Mirror analyzes the multiple and complex ways in which urban Chinese subjects saw themselves interacting with the new visual culture that

emerged during the turbulent period between the 1880s and the 1930s. The media and visual forms examined include lithography, photography, advertising, film, and theatrical performances. Urbanites actively engaged with and enjoyed this visual culture, which was largely driven by the subjective desire for the empty promises of modernity. Promises comprised of such abstract and fleeting concepts as new, exciting, and fashionable. Detailing and analyzing the trajectories of development of various visual representations, Laikwan Pang emphasizes their interactions. In doing so, she demonstrates that visual modernity was not only a combination of independent cultural phenomena but also a partially coherent sociocultural discourse whose influences were seen in different and collective parts of the culture. The work begins with an overall historical account and theorization of a new lithographic pictorial culture developing at the end of the nineteenth century and an examination of modernity's obsession with the investigation of the real. Subsequent chapters treat the fascination with the image of the female body in the new visual culture, entertainment venues in which this culture unfolded and was performed, how urbanites came to terms with and interacted with the new reality, and the production and reception of images, the dynamics between these two being a theme explored throughout the book. Modernity, as the author shows, can be seen as a spectacle. At the same time, she demonstrates that although the excessiveness of this spectacle captivated the modern subject, it did not completely overwhelm or immobilize those who engaged with it. After all, she argues, they participated in and performed with this ephemeral visual culture in an attempt to come to terms with their own new modern self.
