The Imitation Game and Other Plays Ian McEwan, 1982 [The Turing Test](#) James H. Moor, 2012-12-06 In 1950 Alan Turing 1912 1954 published his famous article Computing Machinery and Intelligence in the journal Mind This article is arguably the most influential and widely read article in the philosophy of artificial intelligence Indeed most of the debate in the philosophy of artificial intelligence over the last fifty years concerns issues that were raised and discussed by Turing Turing s genius was not only in developing the theory of computability but also in understanding the impact both practical and philosophical that computing machinery would have Turing believed that computers if properly designed and educated could exhibit intelligent behavior even behavior that would be indistinguishable from human intelligent behavior His vision of the possibility of machine intelligence has been highly inspiring and extremely controversial In this classic article Turing presented his well known imitation game and predicted that about the year 2000 an average interrogator will not have more than 70 per cent chance of making the right identification after five minutes of questioning in the imitation game Based on the results of the Loebner 2000 contest and the accomplishments in the field of AI as impressive as they are Turing s prediction remains unfulfilled *Plays and Games for Indoors and Out* Belle Ragnar Parsons, 1919 [Teenage Audiences and British Period Drama](#) Shelley Anne Galpin, 2024-07-25 This book provides an engaging insight into the responses of teenage audiences to British period drama presenting original data collected from young people across England Situated in relation to debates regarding the heritage film and young people s consumption of the media Teenage Audiences and British Period Drama challenges the often homogenous characterisation of teenagers by demonstrating the range of responses this genre inspires in young viewers Arguing for the period drama s underestimated relevance to younger audiences the book details the varied ways that young people use film and television drama to make sense of the world and their place in it and highlights the under researched significance of collective viewing in influencing viewer response Analysis demonstrates the key role that values play in influencing judgements amongst youth audiences the importance of perceived historical accuracy and the potential for screen texts to inspire a deeper relationship with the past **Industrial Design Engineering** John X.
