The Indescribable Phenomenon The Life And Mysteries Of Anna Eva Fay:

The Indescribable Phenomenon Barry H. Wiley, 2005-01-01 **The Ashgate Research Companion to**

Nineteenth-Century Spiritualism and the Occult Tatiana Kontou, 2016-03-23 Critical attention to the Victorian supernatural has flourished over the last twenty five years Whether it is spiritualism or Theosophy mesmerism or the occult the dozens of book length studies and hundreds of articles that have appeared recently reflect the avid scholarly discussion of Victorian mystical practices Designed both for those new to the field and for experts this volume is organized into sections covering the relationship between Victorian spiritualism and science the occult and politics and the culture of mystical practices The Ashgate Research Companion to Nineteenth Century Spiritualism and the Occult brings together some of the most prominent scholars working in the field to introduce current approaches to the study of nineteenth century mysticism and to define new areas for research **Vanished: Seven Women Magicians Who Simply Disappeared** Anna

Hays, 2025-09-09 Discover the amazing illustrated stories of seven women magicians who pulled off spectacular and death defying illusions and acts achieved global fame and then simply disappeared During the Golden Age of Magic from 1860 to 1930 seven women magicians in America defied Victorian conventions and created a unique place in history for themselves and future performers to come There was Anna the mindreader Adelaide who could float in midair Talma who could magically shower the stage with gold coins and many more During a time when women were typically confined to the home these trailblazers crossed oceans on steamships and traveled the globe bringing their imaginative brand of magic to audiences around the world They followed their hearts and pursued their dreams of performing magic in the spotlight when women had neither a vote nor a voice in America They made history Yet once their career ended so did their legacy For decades their stories were hidden or overshadowed by male counterparts but now they've come to life in this vibrant and captivating book Mysteries and Secrets Revealed Loren Pankratz, 2021-04-01 *Mysteries and Secrets Revealed* uncovers the reality behind mysteries of nature and secrets of frauds that eluded common understanding The journey begins in the ancient Greek city of Delphi where priests claimed the gift of a priceless gold lion was an acknowledgement of their clairvoyant powers But their concocted story concealed an embarrassing blunder Those sufficiently savvy to catch the lie became aware of even deeper problems Author Loren Pankratz then guides us through the conflicts of Renaissance scholars including Galileo who explained things in ways that enraged philosophers and infuriated priests Galileo's methods of investigation were perpetuated by the meticulous work of the Academy of Experiment and Bernard Fontenelle's enthralling dialogue enabled common people to accept life in the rearranged sun centered universe Clairvoyants in a mesmeric trance claimed they could visit distant planets and endure brutal surgical procedures If any of this was real how was it possible One nineteenth century mesmeric savant Alexis Didier was so convincing that someone claimed no case of clairvoyance could be made for anyone if his accomplishments were not real This unchallenged declaration is now unraveled here for the first time

through information gleaned from uncommon documents and rare antiquarian pamphlets The surprising manifestations of modern spiritualism quickly escalated into a psychic arms race that included mysterious tipping and turning of tables Scientist Michael Faraday devised ingenious experiments to show how subtle muscle reactions outside of awareness created these manifestations On the other hand explanations for table levitations and mysterious writing on slates could only be solved by individuals with acute observational skills and acquainted with the methods of trickery Each story in *Mysteries and Secrets Revealed* captures the tension of conflict the thrill of discovery and the strategies of science that unmasked frauds fakes false belief and the enigmas of our natural world

Looking Forward Jamie L. Pietruska, 2017-12-08 In the decades after the Civil War the world experienced monumental changes in industry trade and governance As Americans faced this uncertain future public debate sprang up over the accuracy and value of predictions asking whether it was possible to look into the future with any degree of certainty In *Looking Forward* Jamie L Pietruska uncovers a culture of prediction in the modern era where forecasts became commonplace as crop forecasters weather prophets business forecasters utopian novelists and fortune tellers produced and sold their visions of the future Private and government forecasters competed for authority as well as for an audience and a single prediction could make or break a forecaster's reputation Pietruska argues that this late nineteenth century quest for future certainty had an especially ironic consequence it led Americans to accept uncertainty as an inescapable part of both forecasting and twentieth century economic and cultural life Drawing together histories of science technology capitalism environment and culture *Looking Forward* explores how forecasts functioned as new forms of knowledge and risk management tools that sometimes mitigated but at other times exacerbated the very uncertainties they were designed to conquer Ultimately Pietruska shows how Americans came to understand the future itself as predictable yet still uncertain

Immortal Longings Trevor Hamilton, 2015-12-01 *Immortal Longings* FWH Myers and the Victorian search for life after death is the first full length biography of Frederic W H Myers leading figure in the Society for Psychical Research and friend and associate of Browning Gladstone Ruskin Tennyson Swinburne Henry James Prince Leopold and other influential Victorians The book offers a fascinating insight into a key period in the development of Victorian thought Among many things it covers 1 Extraordinary Phenomena Myers investigated extraordinary phenomena much of which is still reported today out of body experiences and astral projection near death experiences poltergeists gurus like Madame Blavatsky claiming strange powers mediums both private and public and haunted houses for example the giant warrior haunting a chateau near Heidelberg the Cheltenham Ghost that was seen by a considerable number of people and the odd doings at Ballechin House in Scotland which caused a scandal in the press 2 Life After Death Investigations Myers believed he had virtually proved life after death by the link he thought established between hundreds of apparitions and living or dead human beings by the messages that the outstanding mediums Mrs Piper and Mrs Thompson gave him from his first great love Annie and his intimate friend and co worker Edmund Gurney which contained information the medium could

not know and was delivered in a way highly characteristic of the personality concerned 3 Automatic Writing Some researchers have claimed that he has returned after death and proved his continued existence through the automatic writings of a number of mediums in England America India These writings continued for thirty years 4 Romance Suicide There is also love tragedy and jealousy in Myers life His first great love Annie a married woman committed suicide and Myers wife a rather possessive person tried to prevent any detail about this being made public after his death even though the relationship was platonic This inhibited the work of researchers who were trying to verify the post mortem communications from Myers since for many years they could not check the facts 5 Credibility Myers researches led him to forming a view about human personality and psychology which Aldous Huxley has said is much richer than Freud s **Extraordinary Beliefs** Peter Lamont,2013-02-07 Since the early nineteenth century mesmerists mediums and psychics have exhibited extraordinary phenomena These have been demonstrated reported and disputed by every modern generation We continue to wonder why people believe in such things while others wonder why they are dismissed so easily Extraordinary Beliefs takes a historical approach to an ongoing psychological problem why do people believe in extraordinary phenomena It considers the phenomena that have been associated with mesmerism spiritualism psychical research and parapsychology By drawing upon conjuring theory frame analysis and discourse analysis it examines how such phenomena have been made convincing in demonstration and report and then disputed endlessly It argues that we cannot understand extraordinary beliefs unless we properly consider the events in which people believe and what people believe about them And it shows how in constructing and maintaining particular beliefs about particular phenomena we have been in the business of constructing ourselves

The Thought Reader Craze Barry H. Wiley,2012-10-10 Beginning in 1870 the hunger for scientific discovery in Great Britain drove prominent scientists philosophers and others to promote the legitimacy of telepathy At the same time mind reading as a form of entertainment gained increasing popularity as persuasive performers like John Randall Brown W I Bishop and Stuart C Cumberland convinced reporters that they truly could read the thoughts of others The widely publicized sometimes bizarre interactions between scientists and these charlatans ushered in the Thought Reader Craze a period that lasted through about 1910 and saw entertainers make and lose fortunes and scientists make and lose reputations This volume explores this unusual cultural phenomenon showing how it was aided through the years by public scientific pronouncements astonishing performances by the thought readers and the rapidly changing industrial society **Making Things and Drawing Boundaries** Jentery Sayers,2018-01-15 In Making Things and Drawing Boundaries critical theory and cultural practice meet creativity collaboration and experimentation with physical materials as never before Foregrounding the interdisciplinary character of experimental methods and hands on research this collection asks what it means to make things in the humanities How is humanities research manifested in hand and on screen alongside the essay and monograph And importantly how does experimentation with physical materials correspond with social justice and responsibility

Comprising almost forty chapters from ninety practitioners across twenty disciplines *Making Things and Drawing Boundaries* speaks directly and extensively to how humanities research engages a growing interest in maker culture however making may be defined Contributors Erin R Anderson Joanne Bernardi Yana Boeva Jeremy Boggs Duncan A Buell Amy Burek Trisha N Campbell Debbie Chachra Beth Compton Heidi Rae Cooley Nora Dimmock Devon Elliott Bill Endres Katherine Faull Alexander Flamenco Emily Alden Foster Sarah Fox Chelsea A M Gardner Susan Garfinkel Lee Hannigan Sara Hendren Ryan Hunt John Hunter Diane Jakacki Janelle Jenstad Edward Jones Imhotep Julie Thompson Klein Aaron D Knochel J K Purdom Lindblad Kim Martin Gwynnaeth McIntyre Aurelio Meza Shezan Muhammedi Angel David Nieves Marcel O Gorman Amy Papaelias Matt Ratto Isaac Record Jennifer Reed Gabby Resch Jennifer Roberts Smith Melissa Rogers Daniela K Rosner Stan Ruecker Roxanne Shirazi James Smithies P P Sneha Lisa M Snyder Kaitlyn Solberg Dan Southwick David Staley Elaine Sullivan Joseph Takeda Ezra Teboul William J Turkel Lisa Tweten *The Skeptical Inquirer* ,2005
