Riley, 2015-04-13 Robert Riley has been a renowned figure in landscape studies for over fifty years valued for his perceptive learned and highly entertaining articles reviews and essays Much of Riley's work originally ran in *Landscape* the pioneering magazine at which Riley succeeded the great geographer J B Jackson as editor *The Camaro in the Pasture* is the first book to collect this compelling author's writing With diverse topics ranging from science fiction fantasies to problems of academic design research the essays in this volume cover an entire half century of Riley's observations on the American landscape The essays several of which are new or previously unpublished interpret changing rationales for urban beautification the evolution and

transformation of the strip the development of a global landscape of golf and resorts replacing an older search for exoticism and the vernacular landscape as wallpaper rather than quilt Ultimately Riley envisions our future landscape as a rapidly fluctuating electronic net draped over the more slowly changing and familiar land and building based system Throughout Riley emphasizes the vernacular landscape of contemporary America how we have shaped and use it what it is becoming and above all how we experience it Happiness Is A Scam Santosh Jha, 2022-03-01 Nature installs happy life evolution seeks happy creatures brain makes happy hormones people always chase happiness and cultures work overtime manufacturing happy consumptions still happiness is elusive ephemeral Why It is nature s trap a scam people live out unaware It breeds all criminality depravity kills sanity The eBook busts the scam paves way for alternative intentionality Evolution may be a stupid engineering but it put in place a happy mechanism for all living beings with entrenched processes Human ingenuity forced evolution to accept retirement Then it turned the mechanism of happiness processes of reward and success into scams brutally uploading man made Intentionality of criminality depravity over nature s innocuous intelligence Happiness stands hijacked The innate design of nature which evolved the idea and cognition of happiness in organisms seeded the lateral and concomitant emotion of competitiveness This however happened much before humans happened on Earth Competitiveness to optimize happiness and in turn optimize survival successes through the chemical expressions of reward and punishment worked reasonably well in animal world and therefore it continued into human system Competitiveness is not a criminal intent or idea The innocuous cognition of competitiveness could be turned into a theme of criminality and depravity only by extraordinary human intelligence of faking and fudging Happiness got hijacked as humans evolved this novel intelligence to fake fudge fabricate fictionalize and defraud intentionality Languages happened and they became big tools to deception and depravity We need to accept that Happiness has to be our internal landscape and milieu it is in essence an internal body brain process of optimizing knowledge and awareness of self vis vis the external milieu This in truest sense has always been hailed as the centrality of intentionality of all religions and spiritualism Scams however hit them the worst Externalizing Happiness aligning happiness with attainments and possessions of entities in external milieu criminalizes and depraves happiness It has somehow become the nature s trap humanity has not only become slaves to but also used it to scam others and self Nature wants us to be happy organisms and for that it installed chemically mediated and subconsciously orchestrated intentionality of reward and pleasurable successes It instituted the habit forming chemical plexus to remain aligned to rewarding and happy ways which in turn required competitiveness This innate intelligence has now been hijacked by human intelligence and as this competitiveness has become unmanageable in extremely over populated and monstrously unequal society culture polity economy success and reward feelings have to be in connivance of depravity cruelty criminality and deception to attain probability Society cultures polity faith systems economy commerce relationships et al have all become hugely corrupted criminalized and unashamedly fake and deceptive Everyone seems to have fallen into this trap and

we all are living out a scam of reality Human world cannot have benchmarks of animals Humans definitively need an alternative and novel reward regime to qualify as humans They need compassion fraternity equitability knowledge amicability as benchmarks instead of reward pleasure and successes This scam needs to be weeded out of human world Collective spaces are beyond redemption However an individual sure can de scam his or her Consciousness to embark on the journey of true and real happiness This can happen when a person is truly aware and knowledgeable of not only realities but also the mechanism and processes of realities The usual subconscious and perceptual life living cannot help one come out of the scam of happiness and other perceptions This is what this eBook humbly seeks You have the potential the probability awaits you

The Metaphysics of Race Amit

Varshizky, 2024-11-04 This book seeks to reframe debates on the conflicting scientific and spiritual traditions that underpinned the Nazi worldview showing how despite the multitude of tensions and rivals among its adherents it provided a coherent conceptual grid and possessed its own philosophical consistency Drawing on a large variety of works the volume offers insights into the intellectual climate that allowed the radical ideology of National Socialism to take hold It examines the emergence of nuanced conceptions of race in interwar Germany and the pursuit of a new ethical and existential fulcrum in biology Accordingly the volume calls for a re examination of the place of genetics in Nazi racial thought drawing attention to the multi register voices within the framework of interwar racial theory Varshizky explores the ways in which these ideas provided new justifications for the Nazi revolutionary enterprise and blurred the distinction between fact and value knowledge and faith the secular and the sacred and how they allowed Nazi thinkers to bounce across these epistemological divisions This volume will be of interest to scholars of Nazi Germany and World War II intellectual and cultural history the history of science and the philosophy of religion
