Sir William Jardine A Life In Natural History:

Sir William Jardine Christine Jackson, Peter Davis, 2001-08-02 Sir William Jardine was a key figure in the history of Victorian era science. He owned the finest private natural history museum and library in Britain and made natural history widely available by issuing the The Naturalists Library, forty small affordable volumes on birds, mammals, fish, and insects. Yet until now, no comprehensive biography of him existed. This book explores the history of this singular man, his impact on the study of natural history, and its popularization through his publishing efforts. *The Natural History of Edward Lear, New Edition* Robert McCracken Peck, 2021-04-13 Edward Lear is well known as the brilliant writer of nonsense poetry, children's books, and travel books who popularized the limerick and wrote verses such as 'The Owl and the Pussycat'. But few people are aware that Lear was one of the most talented and accomplished painters of natural history subjects in the nineteenth century and worked with British scientists, collectors, and publishers to make Britain the nexus for scientific investigation and its circulation. One of the best ornithological artists of his generation, Lear published his first book, a monograph on the parrot family, at age 18 and established a format that would be followed by decades by such publishers as John Gould, with whom he worked closely and often anonymously. Over his career, Lear produced a multitude of drawings of birds and mammals from around the world for scientific publications, public institutions, and individual patrons, not just of English species but of birds and mammals from Australia, New Zealand, and the Americas. He is also the Lear in the name of the rare species Lear's Macaw. In this book, Peck has assembled the first comprehensive view of this important part of Lear's career. Featuring over 200 illustrations and a foreword by Sir David Attenborough, the book also examines the influence Lear had on modern artists such as Walton Ford and Tony Foster. This new edition includes a new chapter that addresses Lear's continued fascination with wildlife and the natural world after giving up his career as a scientific illustrator and his fascination with domestic pets from his own beloved cat, which he cartooned repeatedly, to the portraits of dogs owned by his family and friends, alongside thirteen never before published illustrations, including fully finished watercolors, rough preliminary sketches, and whimsical cartoons.

The Origins of Himalayan Studies David Waterhouse, 2004-10-28 Brian Hodgson lived in Nepal from 1820 to 1843, during which time he wrote and published extensively on Nepalese culture, religion, natural history, architecture, ethnography, and linguistics. Contributors from leading historians of Nepal and South Asia and from specialists in Buddhist studies, art history, linguistics, ornithology, and ethnography critically examine Hodgson's life and achievement within the context of his contribution to scholarship. Many of the drawings photographed for this book have not previously been published.

Victorian Culture and the Origin of Disciplines Bernard Lightman, Bennett Zon, 2019-06-20 Current studies in disciplinarity range widely across philosophical and literary contexts, producing heated debate and entrenched divergences. Yet despite their manifest significance for us today, seldom have those studies engaged with the Victorian origins of modern disciplinarity. *Victorian Culture and the Origin of Disciplines* adds a crucial missing link in that history by asking and

answering a series of deceptively simple questions how did Victorians define a discipline what factors impinged upon that definition and how did they respond to disciplinary understanding Structured around sections on professionalization university curriculums society journals literary genres and interdisciplinarity Victorian Culture and the Origin of Disciplines addresses the tangled bank of disciplinarity in the arts humanities social sciences and natural sciences including musicology dance literature and art history classics history archaeology and theology anthropology psychology and biology mathematics and physics Chapters examine the generative forces driving disciplinary formation and gauge its success or failure against social cultural political and economic environmental pressures No other volume has focused specifically on the origin of Victorian disciplines in order to track the birth death and growth of the units into which knowledge was divided in this period and no other volume has placed such a wide array of Victorian disciplines in their cultural context The Naturalist's Library, I.
