The Resilience Framework Stefan Tengblad, Margareta Oudhuis, 2017-08-31 This book puts forward a carefully crafted theoretical framework that makes a substantial contribution to the field of organizational resilience It is a framework that goes far beyond the traditional crisis management perspective accidents scandals etc to an investigation of the characteristics and factors that make organizations viable over time The book creates a much needed link between human resource management and organizational development on the one hand and the literature about risk and crises management and resilience engineering on the other The book assembles several robust social science theories such as evolutionary theory complexity theory and institutional theory as well as concepts from management theory such as followership organizational trust open innovation and serendipity management into a coherent framework It also integrates important models from the field of resilience engineering that have not previously been included in the research on organizational resilience Several new models are used to present the theoretical framework models that have relevance for researchers as well as practitioners In addition to the

theoretical framework all chapters are set in various practical environments that both illustrate the use of resilience resources and align with the framework itself

Innovation and Employment in Services Johanna Nählinder, 2005-10-07
This is a study of innovation in Knowledge Intensive Business Services KIBS and the impact innovation has on employment. The thesis relies on theories within the fields of innovation in services in particular KIBS and innovation and employment taking as its point of departure the taxonomy of product and process innovation. The thesis is based on a discussion of innovation in services with a focus on how innovation in services may be understood and delineated. A long discussion is dedicated to the taxonomy of product and process innovation and the extent to which these concepts may be applicable to innovation in services. The thesis also scrutinises the concept of KIBS and how this can be defined. It further discusses features commonly associated with KIBS firms. The thesis is also rooted in the broader issue of innovation as a creator and destroyer of employment and makes a contribution in applying these issues to service sectors. The empirical part of the thesis builds on a database compiled for the research project comprised of 967 Swedish KIBS firms. The database covers issues of innovation, employment and characteristics of the firm. The findings indicate that innovation was common in Swedish KIBS firms and that innovations often had an impact on employment. However, the thesis did not detect a straightforward relation between type of innovation, technological process innovation, organisational process innovation, goods product innovation and service product innovation and the impact on employment. Explanations other than type of innovation have to be considered to analyse the impact of innovation on employment. The thesis further suggests that although innovation in KIBS is common, innovation itself is difficult to conceptualise and delineate.
