## Stockholm University A History:

**CUCUMIS-SATIVUS L.** 1976, 000000 000000 00 000000 0000 Making Cultural History Anna Kallen,2015-01-01 This volume contains 17 essays with fresh new approaches to cultural history from 17 authors that belong to different academic disciplines including archaeology art history classical languages ethnology fashion studies history history of ideas history of religion literature studies and media studies Making Cultural History has sprung out of the Research School for Studies in Cultural History at Stockholm University an interdisciplinary research program focusing on interplays between past and present The authors of this volume display a kaleidoscope of innovative approaches to traditional academic subjects such as celebrity literary genre prehistoric remains television and historic monuments The perspectives focus on obscure corners and gaps between the illuminated centers of traditional academic knowledge and create an understanding that all narratives representations and claims of culture and history are in some sense political Challenging disturbing inspirational these essays all make cultural history

**Historical Understanding** Zoltán Boldizsár Simon,Lars Deile,2022-02-24 The first decades of the new century shake old certainties In a whirlwind of profound changes do we have more history or less Does history overwhelm us in all domains of life or is historical understanding in yet another crisis The answers do not come easily The recent demise of humanities education the technological alterations of our social lifeworlds and the human condition the anthropogenic changes in the Earth system the growing sense of memory trauma and historical injustice as alternative approaches to the past seem to entail contradictions and complexities that do not fit very well with our existing notions of historical understanding Historical thought as we know it is facing manifold challenges and we struggle to grasp a larger picture that could encompass them Boasting a range of contributions from leading scholars this volume attempts just that In an innovative collection of short essays Historical Understanding explores the current shape of historical understanding today by surveying a variety of historical relations to the past present and future in the face of socio political ecological and technological upheavals This book is an invaluable research tool for students and researchers alike presenting a kaleidoscope like overview of manifold new ways which we navigate historically in coping with present day challenges both in wider society and in historiography

**The Soybean Through World History** Matilda Baraibar Norberg,Lisa Deutsch,2023-06-30 This book examines the changing roles and functions of the soybean throughout world history and discusses how this reflects the complex processes of agrofood globalization The book uses a historical lens to analyze the processes and features that brought us to the current global configuration of the soybean commodity chain From its origins as a peasant food in ancient China today the protein rich soybean is by far the most cultivated biotech crop on Earth used to make a huge variety of food and industrial products including animal feed tofu cooking oil soy sauce biodiesel and soap While there is a burgeoning amount of literature on how the contemporary global soy web affects large tracts of our planet s social ecological systems

little attention has been given to the questions of how we got here and what alternative roles the soybean has played in the past This book fills this gap and demonstrates that it is impossible to properly comprehend the contemporary global soybean chain or the wider agrofood system of which it is a part without looking at both their long and short historical development However a history of the soybean and its changing roles within equally changing agrofood systems is inexorably a history about globalization Not only does this book map out where soybeans are produced but also who governs wields power and accumulates capital in the entire commodity chain from inputs in production to consumption as well as identifying the institutional context the global commodity chain operates within The book concludes with a discussion of the main challenges and contradictions of the current soy regime that could trigger its rupture and end This book is essential reading for students practitioners and scholars interested in agriculture and food systems global commodity chains globalization environmental history economic history and social ecological systems
