The Moon's Galactic History Constance Victoria Briggs, 2022-10-28. The Moon's Galactic History: A Look at the Moon's Extraterrestrial Past and Its Connection to Earth follows the past and present research about the Moon's strange enigmatic history with a focus on an extraterrestrial presence. The book examines such questions as: Are there Moon inhabitants? Are the UFOs seen today connected to the Moon? Is there a city on the Moon and more. Additionally, Briggs discusses things observed on the Moon including anomalous strange lights, unidentified flying objects, odd constructions, artifacts, symbols, and more. This book examines new thoughts and ideas from researchers and what their ideas are today about the extraterrestrial Moon-Earth connection and what it means for us. With all the information on unidentified flying objects in the news today, it is time to have an updated book with current research that investigates both the past and present material on the Moon. Did you know that several of the NASA astronauts reported seeing UFOs while traveling to the Moon? The Moon might be hollow. Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon. Mysterious anomalous activity has been seen on the Moon for centuries; there are said to be ruins of structures on the Moon and more.

The Complete Cosmicomics Italo Calvino, 2014-09-16. The complete collection of nimble and often hilarious short stories exploring the cosmos by the acclaimed author of *Invisible Cities*. Colin Dwyer, NPR. Italo Calvino's beloved cosmicomics cross planets and traverse galaxies, speed up time or slow it down to the particles of an instant. Through the eyes of a cosmic know-it-all with the unpronounceable name of Qfwfq, Calvino explores natural phenomena and tells the story of the origins of the universe. Relating complex scientific and mathematical concepts to our everyday world, they are an indelible and delightful literary achievement. Originally published in Italian in three separate volumes, including the Asti d'Appello Prize-winning first volume, *Cosmicomics*, these thirty-four dazzling stories are collected here in one definitive English language anthology. Trying to describe such a diverse and entertaining mix, I have to admit just as Calvino does so often that my words fail here too. There's no way I or anyone really can muster enough of them to quite capture the magic of these stories. Read this book, please. Colin Dwyer, NPR.
