Summoning the Powers Beyond Jay Dobbin, Francis X. Hezel, 2011-09-30 *Summoning the Powers Beyond* collects and reconstructs the old religions of preindustrial Micronesia It draws mostly from written sources from the turn of the nineteenth century and the period immediately after World War II reports of the Hamburg South Sea Expedition of 1908 1910 articles by German Roman Catholic missionaries in Micronesia included in the journal *Anthropos* and reports by the Coordinated Investigation of Micronesian Anthropology CIMA and the American Board of Commissioners of the Foreign Missions ABCFM A detailed introduction and an overview of Micronesian religion are followed by separate chapters detailing religion in the Chuukic speaking islands Pohnpei Kosrae the Marshall Islands Yap Palau Kiribati and Nauru The Chamorro speaking group of the Marianas is omitted because lengthy periods of intense military and missionary activity eradicated most of the local religion The Polynesian outliers Nukuoro and Kapingamarangi are discussed at the end primarily to underscore the contrasts between Polynesian and Micronesian religion In a concluding chapter the author highlights the similarities and differences between the areas within Micronesia and then attempts an appreciation or evaluation of Micronesia religion Finally he addresses the evidence of a tentative hypothesis that Micronesian religion is sufficiently different from that of Polynesia and Melanesia to justify the continued claim of a separate Micronesian religion

Environment, Technology, and Development Ismay Milford, Corinna R. Unger, Iris Borowy, 2025-12-01 Histories of environment and histories of technology have moved in exciting interdisciplinary directions in recent years with increasing recognition that both environments and technologies are made and remade gaining meaning only in specific historical settings With historical scholarship weighted towards examples from the North Atlantic world this volume provides a collection of grounded case studies from across the modern world that interrogate the relationship between environment and technology in developmental practices and discourses Development projects have often involved assumptions that humans

can create and wield technology to harness improve or protect the non human environment This volume will not simply discredit these assumptions by revealing their nefarious effects on our society and planet but instead historicise them by locating them within specific power structures and epistemologies The connections and conversations between dispersed cases raised here point us to more nuanced conclusions about the causes and effects the objects and subjects of history in this dynamic interaction between environment technology and development
