Story And Scandal Of Hms Megaera:

The Story and Scandal of HMS Megaera R. A. Hayward, 1978 **Before the Ironclad** David K. Brown, 2015-09-09 In the massive revolution that affected warship design between Waterloo and the Warrior the Royal Navy was traditionally depicted as fiercely resisting every change until it was almost too late but these old assumptions were first challenged in this authoritative history of the transition from sail to steam Originally published in 1990 it began a process of revaluation which has produced a more positive assessment of the British contribution to the naval developments of the period This classic work is here reprinted in an entirely new edition with more extensive illustration Beginning with the structural innovations of Robert Seppings the book traces the gradual introduction of more scientific methods and the advent of steam and the paddle fighting ship iron hulls and screw propulsion It analyses the performance of the fleet in the war with Russia 1853-1856 and concludes with the design of the Warrior the first iron hulled seagoing capital ship in the world The author presents a picture of an organisation that was well aware of new technology carefully evaluating its practical advantage and occasionally as with its enthusiastic espousal of iron hulls moving too quickly for the good of the service Written by an eminent naval architect *Before the Ironclad* is both a balanced account of general developments and an in depth study of the ships themselves

Ships' Fastenings Michael McCarthy, 2023-01-15 Without effective and durable hull fastenings boats and ships from the earliest days of seafaring through the twentieth century could not have plied the seas In this second edition of *Ships Fastenings From Sewn Boat to Steamship* author Michael McCarthy amplifies and extends his thorough treatment of the parts that hold the boat together offering fascinating descriptions of a range of techniques that span from sewn plank boats of the ancient world and Micronesia to Viking ships Mediterranean caravels nineteenth century ocean clippers and even steamships To further contextualize this comprehensive account McCarthy provides a history of many of the discoveries and innovations that accompanied changes in the kinds of fastenings used and the ways they were secured He discusses copper sheathing metallurgy the advent of Muntz metal rivets of all types welding in the ancient and modern sense and the types of non magnetic fastenings needed on World War II minesweepers He even takes a glance at the development of underwriting and insurance because the registries kept by Lloyd's and others provided not only guides to the suitability of a particular ship but also dictated the form and method of fastening A boon to shipbuilders historians and archaeologists *Ships Fastenings* is also a valuable guide for the enthusiast and amateur boat builder *Ships' Fastenings* Mike McCarthy, 2005 In this first detailed study of hull fastenings Michael McCarthy describes those found on ships throughout the ages from sewn plank boats of the ancient world and Micronesia to Viking ships Mediterranean caravels nineteenth century ocean clippers and steamships McCarthy also provides a history of many discoveries and innovations that accompanied changes in the kinds of fastenings used and the way they were secured such as copper sheathing metallurgy and welding Underwriting and insurance are also discussed since the registries kept by Lloyd's and others dictated the form and method of fastening This
