Givens,Karen M. Reeds,Alain Touwaide,2016-12-05 Images in medieval and early modern treatises on medicine pharmacy and natural history often confound our expectations about the functions of medical and scientific illustrations They do not look very much like the things they purport to portray and their actual usefulness in everyday medical practice or teaching is not obvious By looking at works as diverse as herbals jewellery surgery manuals lay health guides cinquecento paintings manuscripts of Pliny s Natural History and Leonardo s notebooks Visualizing Medieval Medicine and Natural History 1200 1550 addresses fundamental questions about the interplay of art and science from the thirteenth to the mid sixteenth century What counts as a medical illustration in the Middle Ages What are the purposes and audiences of the illustrations in medieval medical pharmaceutical and natural history texts How are images used to clarify expand authenticate and replace these texts How do images of natural objects observed phenomena and theoretical concepts amplify texts and convey complex cultural attitudes What features lead us to regard some of these images as typically medieval while other exactly contemporary images strike us as Renaissance or early modern in character Art historians medical historians historians of science and specialists in manuscripts and early printed books will welcome this wide ranging interdisciplinary examination of the role of visualization in early scientific inquiry The Viandier of Taillevent Terrence Scully,1988-01-01 This volume is the first to present all four extant manuscripts of the Viandier de Taillevent The texts of the 220 recipes are in their original French and a complete English translation is provided Variants between the four manuscripts represent more than a century of modifications in gastronomic tastes and culinary practices in French seigneurial life The commentary and notes trace the significance of these modifications and indicate the influence the Viandier exercised on more recent cookery books throughout Europe This critical edition also includes a glossary and a bibliography In addition selected recipes have been adapted for modern use and arranged in a menu for six people Published in English **Misconceptions About the Middle Ages** Stephen Harris,Bryon L. Grigsby,2010-05-26 Interest in the middle ages is at an all time high at the moment thanks in part to The Da Vinci Code

Never has there been a moment more propitious for a study of our misconceptions of the Middle Ages than now Ranging across religion art and science Misconceptions about the Middle Ages unravels some of the many misinterpretations that have evolved concerning the medieval period including the church war science art society With an impressive international array of contributions the book will be essential reading for students and scholars involved with medieval religion history and culture

Eating Right in the Renaissance Ken Albala, 2002-02 Albala's engaging tour through the host of Renaissance dietary theories reminds us that our preoccupations with food and susceptibility to cranky advice about nutrition are nothing new This is superior scholarship delivered with a light touch Rachel Laudan author of The Food of Paradise Exploring Hawaii's Culinary Heritage This stimulating work is an important contribution to social and especially medical dietetic history Albala is the first to explore in detail the role of dietetic literature in the development of the European nation state His book is a pleasure to read Melitta Weiss Adamson editor of Food in the Middle Ages
