Typological Change in Chinese Syntax Dan Xu, 2006 This new interpretation of the early history of Chinese argues that Old Chinese was typologically a mixed language It shows that though its dominant word order was subject verb object this coexisted with subject object verb Professor Xu demonstrates that Old Chinese was not the analytic language it has usually been assumed to be and that it employed morphological and lexical devices as well as syntactic means She describes the typological changes that have taken place since the Han period and shows how Chinese

evolved into a more analytic language supporting her exposition with abundant examples. She draws where possible on archaeological findings in order to distinguish between versions of texts transmitted and sometimes modified through the hands of generations of copyists. The author focusses on syntactic issues including word order, verbs, causative structures, resultative compounds and negation but also pays close attention to what she demonstrates are closely related changes in phonology and the writing system. The book will interest scholars and graduate students of Chinese linguistics, philology, classical literature as well as general linguists interested in word order typology and language universals. It may be also be used as a text for advanced courses in Classical Chinese and Chinese diachronic syntax. *The Baker Expository Dictionary of Biblical Words* Tremper III Longman, Mark L.
