Fischer, 2015-06-08 Twenty seven year old Steven Thomas works hard as a professor of mathematics and engineering and plays hard at tennis in his spare time playing professionally but without making much money Everything in his life seems normaluntil strange things begin to happen around him like lamps that suddenly refuse to work when he is nearby Steve it seems has developed telekinesis the power to move things with his mind Learning to control his new powers he first uses them simply to win tennis tournaments As time goes on he realizes he has the power to do much morealthough he is curious about why and how he managed to acquire such power He meets and falls in love with a beautiful woman but wonders whether the attraction between them is genuine or yet another effect of his new powers Steves life begins to change drastically and he decides he must use his gift to make the world a better place Along the road to his destiny he encounters the CIA a bank robber with powers similar to his own and aliens intent on invading the earth In this science fiction novel one man given the gift of telekinesis must learn to use his powers in order to change his world for the better The Physics of the Mind Phil Mollon, 2025-10-09 The Physics of the Mind New Perspectives for Psychotherapists Healers and Seekers is aimed at psychotherapists psychoanalysts healers and anyone interested in the interface of physics and the mind Both are interesting topics even more so when combined Phil Mollon's expertise is within psychology and over his long career he came to realise the importance of physics to the field In particular the branches that place mind and consciousness in the foreground of how we might understand the universe and our place within it There is a deep organising principle operating at all levels of the universe It gives rise to life and is apparent within the human mind in dreams and creativity A key lesson from quantum physics is that consciousness and the human mind are inextricably involved in the emergence of what we can observe and experience of our matter based realm In other words the behaviour of the quantum realm is shaped by our observation of it Just as we think of space time as shaped by gravitational forces and massive bodies so we can conceptualise mind space The latter contains mathematical correlithms of thought emotion and memory whereby what is similar attracts more of the same in a manner analogous to gravity These have effects within the mind and in the wider life field For example severe and repeated childhood trauma creates the equivalent of black holes in the mind space Metaphysics posits that our matter based universe is subtended within an infinite unified field of intelligence and creativity We are contained within a vast mind The principle is that unlimited guidance and knowledge is available via meditation and intuition requiring only that we seek It is never thrust upon us This is a book filled with extraordinary ideas to dip into wherever curiosity and intuition lead It is the author's fervent wish that what is within will stimulate thought and awareness and spark continuing creative concepts concerning our place in this cosmos
