The Martial Metropolis Us Cities In War And Peace:

The Martial Metropolis Roger W. Lotchin, 1984 Covers the period between the end of World War I and the escalation of the Vietnam conflict during which both U S cities and the U S military came of age The cities chosen have had longstanding and broad partnerships with the military Each city is either broadly representative or typical of some part of the partnership and provides coverage for different services kinds of cities and geographic locations *America Becomes Urban* Eric H. Monkkonen, 2024-06-04 America s cities celebrated by poets courted by politicians castigated by social reformers In their numbers and complexity they challenge comprehension Why is urban America the way it is Eric Monkkonen offers a fresh approach to the myths and the history of US urban development giving us an unexpected and welcome sense of our urban origins His historically anchored vision of our cities places topics of finance housing social mobility transportation crime planning and growth into a perspective which explains the present in terms of the past and offers a point from which to plan for the future This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988 with a paperback in 1990 Globalizing L.A. Steven P. Erie, 2004 The author chronicles LA s emergence as the nation s leading trade centre and gateway to the Pacific Rim in the 20th century exploring recent epic battles over port development expanding LAX creating a new international airport in Orange County building the Alameda Corridor rail link and more **Greater Gotham** Mike Wallace, 2017-09-04 Volume two of the world famous trilogy on the history of New York *American Military History* Daniel K. Blewett, 2008-12-30 In this companion volume to his 1995 bibliography of the same title Daniel Blewett continues his foray into the vast literature of military studies As did its predecessor it covers land air and naval forces primarily but not exclusively from a U S perspective with the welcome emergence of small wars from publishing obscurity In addition to identifying relevant organizations and associations Blewett has gathered together the very best in chronologies bibliographies biographical dictionaries indexes journals abstracts glossaries and encyclopedias each accompanied by a brief descriptive annotation This work remains a pertinent addition to the general reference collections of public and academic libraries as well as special libraries government documents collections military and intelligence agency libraries and historical societies and museums **The Missile Next Door** Gretchen Heefner, 2012-09-10 In the 1960s the Air Force buried 1 000 ICBMs in pastures across the Great Plains to keep U S nuclear strategy out of view As rural civilians of all political stripes found themselves living in the Soviet crosshairs a proud Plains individualism gave way to an economic dependence on the military industrial complex that still persists today *In Pursuit of Privilege* Clifton Hood, 2016-11-08 A history that extends from the 1750s to the present In Pursuit of Privilege recounts upper class New Yorkers struggle to create a distinct world guarded against outsiders even as economic growth and

democratic opportunity enabled aspirants to gain entrance. Despite their efforts New York City's upper class has been drawn into the larger story of the city both through class conflict and through their role in building New York's cultural and economic foundations. In Pursuit of Privilege describes the famous and infamous characters and events at the center of this extraordinary history from the elite families and wealthy tycoons of the eighteenth and nineteenth centuries to the Wall Street executives of today. From the start upper class New Yorkers have been open and aggressive in their behavior keen on attaining prestige power and wealth. Clifton Hood sharpens this characterization by merging a history of the New York economy in the eighteenth century with the story of Wall Street's emergence as an international financial center in the late nineteenth and early twentieth centuries as well as the dominance of New York's financial and service sectors in the 1980s. Bringing together several decades of upheaval and change he shows that New York's upper class did not rise exclusively from the Gilded Age but rather from a relentless pursuit of privilege affecting not just the urban elite but the city's entire cultural economic and political fabric.

The Second Gold Rush Marilynn S. Johnson, 1996-12-29 At last a close in account of California during its moment of rebirth. World War II: A book that helps us to understand California's past and also its present. James N. Gregory author of American Exodus

Arsenal of World War II Paul A. C. Koistinen, 2004 Prolific munitions production keyed America's triumph in World War II but so did the complex economic controls needed to sustain that production. Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business. While that relationship was remarkably successful in helping the U.S. win the war it also raised troubling issues about wartime economies that have never been fully resolved. Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly global war. Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services. Koistinen traces the evolution of federal agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942-1945. As the war progressed the WPB and related agencies oversaw the military's supply and procurement systems stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food. In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently riven with dissension as New Deal reformers and anti New Deal corporate elements battled for control over mobilization itself. As the armed services emerged as the principal customers of a command economy the military industrial nexus consolidated its power and ultimately succeeded in bending the reformers to its will. The product of exhaustive archival

research Arsenal of World War II shows that mobilization meant more than simply harnessing the economy for war it also involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe

Contested Ground John Emmeus Davis, 2018-08-06 One of the most striking characteristics of urban protest and social conflict in the United States Britain and other nations of the West over the last three decades is the frequency with which these political events have been organized not where people work but where they live The residential communities in which people have their homes raise their children and relate to each other more as neighbors than as co workers have become veritable seedbeds of collective action **Contested Ground** provides a new approach to understanding how and why such community based action occurs Drawing critically and selectively from Marxian theories of conflict and neo Weberian theories of housing classes John Emmeus Davis argues that the political life of residential communities can be explained largely in terms of the competing interests that groups possess by virtue of different and distinctive ways of relating to their community s domestic property land and buildings that are used for shelter In Part I of his book he proposes domestic property interests as the cornerstone of a theoretical framework for exploring the appearance and disappearance the development and decline and the cooperation and conflict of the organized groups of the homeplace In Part II he tests the plausibility of this framework against the social and political realities of an inner city neighborhood known as the West End in Cincinnati Ohio A neighborhood shaped by successive waves of private investment and disinvestment city neglect and city planning urban renewal and gentrification the domestic property of the West End has been the contested ground from which many community organizations have grown Using archival records oral histories and organizational documents Davis unfolds the story of the rise and fall of these grassroots groups Davis s concluding chapters evaluate the theoretical and practical implications of his approach He believes that his analysis may complement neo Marxian theories of urban development and capitalist reproduction and also provide new insight into ways in which planners activists and policy makers can influence the internal politics of the urban neighborhood
