Lecture Notes in Mathematics, 1964 **Stochastic convergence of weighted sums of random elements in linear spaces** R. L. Taylor, 1978 *Stochastic Convergence of Weighted Sums of Random Elements in Linear Spaces* Robert L. Taylor, 2006-11-15 *Asymptotic Behaviour of Linearly Transformed Sums of Random Variables* V.V. Buldygin, Serguei Solntsev, 2012-12-06 Limit theorems for random sequences may conventionally be divided into two large parts one of them dealing with convergence of distributions weak limit theorems and the other with almost sure convergence that is to say with asymptotic properties of almost all sample paths of the sequences involved strong limit theorems Although either of these directions is closely related to another one each of them has its own range of specific problems as well as the own methodology for solving the underlying problems This book is devoted to the second of the above mentioned lines which means that we study asymptotic behaviour of almost all sample paths of linearly transformed sums of independent random variables vectors and elements taking values in topological vector spaces In the classical works of P Levy A Ya Khintchine A N Kolmogorov P Hartman A Wintner W Feller Yu V Prokhorov and M Loeve the theory of almost sure asymptotic behaviour of increasing scalar normed sums of independent random variables was constructed This theory not only provides conditions of the almost sure convergence of series of independent random variables but also studies different versions of the strong law of large numbers and the law of the iterated logarithm One should point out that even in this traditional framework there are still problems which remain open while many definitive results have been obtained quite recently *Convergence in Ergodic Theory and Probability* Vitaly Bergelson, Peter March, Joseph Rosenblatt, 2011-06-15 This series is devoted to the publication of monographs lecture resp seminar notes and other materials arising from programs of the OSU Mathematical Research Institute This includes proceedings of conferences or workshops held at the Institute and other mathematical writings
