

An Apprenticeship and Its Stocktakings: Leibowitz, Boulez, Messiaen, and the Discourse and Practice of New Music

MAX ERWIN 

Abstract

The textbook historical account of post-war New Music describes a logical and radical succession from Schoenberg to Webern to the Darmstadt School. Against this narrative of inevitability, I provide a more contingent account of the institutionalization of a particular discourse of New Music in the aftermath of the Second World War in Europe. What is contingent here is not so much why or how certain figures – chiefly Pierre Boulez and René Leibowitz – were important, but the shape and the logic by which this importance was established and maintained. Accordingly, this article first of all provides a summary of just what it meant for Leibowitz's understanding of New Music to be reproduced in an institutional capacity. From here, I undertake close critical reading of Boulez's break with Leibowitz in order to discover what, exactly, Boulez began to do differently to establish a new practice.

Introduction

This article scrutinizes the relationship between Pierre Boulez and his two major composition teachers, Olivier Messiaen and René Leibowitz. Besides offering a summary of established accounts on what transpired between Leibowitz and Boulez in the late 1940s, it contextualizes Boulez's position within both his own writings and compositions and the broader institutional context of New Music in Europe in the early post-war era. The aim here is to provide a more contingent understanding of what was at stake for musicians active in New Music at this time, an understanding that qualifies the grimly familiar textbook narrative of succession wherein Schoenberg begat Webern who in turn begat Darmstadt.¹

The resulting view of the development of 'serialism' presented here is both simpler and more complex than such a genealogy. Simpler because, through the work of Inge Kovács, I demonstrate that not only were Boulez and Leibowitz reproducing the same discourse but also pursuing the same musical practice – no intensification, no radicalization, just *polyphonic*.² More complex, because the essential identity in both discourse and practice between Boulez and his supposedly estranged teacher means that textbook shorthand descriptions for

Bailey,1996-08-28 This collection of essays looks at the music of Webern from several different perspectives Webern scholarship based on the sketches and other primary material now owned by the Paul Sacher Stiftung in Basel and the Library of Congress in Washington has emphasised Webern's lyricism and this is a theme running through Webern Studies Most of the essays are the result of work with primary material The volume includes entries from Webern's diaries and all of the row tables for his twelve note music A comprehensive Webern bibliography covers thoroughly the period since Zoltan Roman's bibliography of 1978 **Messiaen's Musical Techniques: The Composer's View and Beyond** Gareth

Healey,2016-04-22 Despite Messiaen's position as one of the greatest technical innovators of the twentieth century his musical language has not been comprehensively defined and investigated The composer's 1944 theoretical study The Technique of My Musical Language expounds only its initial stages and while his posthumously published *Traité de rythme, de couleur, et d'ornithologie* contains detailed explanations of selected techniques in most cases the reader is left to define these more precisely by observing them in the context of Messiaen's analyses of his own works Technical processes are nevertheless in many cases the primary components of a work or movement For instance *personnages* dominate *Joie du sang des toiles* from the *Turangala* symphonie and in certain cases such as *Le change* from the *Vingt regards sur l'Enfant Jésus* the process asymmetric augmentation is the only structuring element present Given this reliance on idiosyncratic techniques clear comprehension of the music is impossible without a detailed knowledge of Messiaen's methods Gareth Healey charts their development and interconnections considers their relationship with formal structures and applies them in refined and extended form to works for which Messiaen himself left no published analysis Alban Berg Bryan R.
