Deacon, Janette Deacon, 1999 Specialists in Stone Age archaeology in South Africa present the results of nearly 150 years of research that follows the development of humans from their early beginnings to the late 19th century They offer evidence that the roots of South African society stretch back into the Stone Age Annotation copyrighted by Book News Inc Portland OR *The Peopling of Southern Africa* R. R. Inskeep, 1978 **Before Modern Humans** Grant S. McCall, 2020-09-10 This fascinating volume assessing Lower and Middle Pleistocene African prehistory argues that the onset of the Middle Stone Age marks the origins of landscape use patterns resembling those of modern human foragers Inaugurating a paradigm shift in our understanding of modern human behavior Grant McCall argues that this transition related to the origins of home base residential site use occurred in mosaic fashion over the course of hundreds of thousands of years He concludes by proposing a model of brain evolution driven by increasing subsistence diversity and intensity against the backdrop of larger populations and Pleistocene environmental unpredictability McCall argues that human brain size did not arise to support the complex patterns of social behavior that pervade our lives today but instead large human brains were co opted for these purposes relatively late in prehistory accounting for the striking archaeological record of the Upper Pleistocene Stone Age Africa Louis Seymour Bazett Leakey, 1936 Stone Age Africa Louis S.
