Scranton,2016-11-15 An investigation of the origins of the Neolithic farming village on Orkney Island Reveals the striking similarities between Skara Brae and the traditions of pre dynastic ancient Egypt as preserved by the Dogon people of Mali Explains how megalithic stone sites near Skara Brae conform to Dogon cosmology Examines the similarities between Skara Brae and Gobekli Tepe and how Skara Brae may have been a secondary center of learning for the ancient world In 3200 BC Orkney Island off the coast of Northern Scotland was home to a small farming village called Skara Brae For reasons unknown after nearly six centuries of continuous habitation the village was abandoned around 2600 BC and its stone structures covered over perhaps deliberately like the structures at Gobekli Tepe Although now well excavated very little is known about the peaceful people who lived at Skara Brae or their origins Who were they and where did they go Drawing on his in depth knowledge of the connections between the cosmology and linguistics of Egyptian Dogon Chinese and Vedic traditions Laird Scranton reveals the striking similarities between Skara Brae and the Dogon of Mali who still practice the same cosmology and traditions they once shared with pre dynastic Egypt He shows how the earliest Skara Brae houses match the typical Dogon stone house as well as Schwaller de Lubicz s intepretation of the Egyptian Temple of Man at Luxor He explains how megalithic stone sites near Skara Brae conform to Dogon cosmology each representing sequential stages of creation as described by Dogon priests and he details how the houses at Skara Brae also represent a concept of creation Citing a linguistic phenomenon known as ultraconserved words the author compares words of the Faroese language at Skara Brae a language with no known origin with important cosmological words from Dogon and ancient Egyptian traditions finding obvious connections and similarities Scranton shows how the cultivated field alongside the village of Skara Brae corresponds to the heavenly field symbolism pervasive throughout many ancient cultures such as the Field of Reeds of the ancient Egyptians and the Elysian Fields of ancient Greece He demonstrates how Greek and Egyptian geographic descriptions of these fields are a consistent match with Orkney Island Examining the similarities between Skara Brae and Gobekli Tepe Scranton reveals that Skara Brae may have been a secondary center of initiation and civilizing knowledge a long lost Egyptian mystery school set up millennia after Gobekli Tepe was ritually buried and given the timing of the site is possibly the source of the first pharaohs and priests of ancient Egypt **Scotland** Roger Dendinger,Charles F. Gritzner,2009

Literature Connections to World History K6 Lynda G. Adamson, 1998-04-15 Identifying thousands of historical fiction novels, biographies, history trade books, CD-ROMs, and videotapes help you locate world history resources for students. Each is divided into two sections. In the first part, titles are listed according to grade levels within specific geographic areas and time periods. They are further organized by product type. Both books cover world history from Prehistory and the Ancient World to 54 B.C. to the modern era. Other chapters include Roman Empire to A.D. 476, Europe and the British Isles, Africa and South Africa, Australia, New Zealand, Pacific Islands, and Antarctica, Canada, China, India, Tibet, and Burma, Israel and Arab Countries, Japan, Vietnam, Korea, Cambodia, and Thailand, and South and Central America and the Caribbean. The second section has an annotated bibliography that describes each title and includes publication information and awards. The focus is on books published since 1990 and all have received at least one favorable review.

Constitutional Culture, Independence, and Rights Javier Garcia Oliva, Helen Hall, 2023-05-26 In *Constitutional Culture, Independence, and Rights*, Javier Garcia Oliva and Helen Hall coin the term constitutional culture to encapsulate the collective rules and expectations that govern the collective life within a jurisdiction. Significantly, these shared norms have both legal and social elements, including matters as diverse as standards of parenting, the modus operandi of police officers, and taboos around sexuality. Using Quebec, Scotland, and Catalonia as case studies, the book delves into what these constitutional battles mean for the rights, identity, and needs of everyday people, and it powerfully demonstrates why the hypothetical future independence of these regions would have far-reaching practical consequences beyond the realm of political structures and academic theory. The book does not present a magic bullet to resolve debates around independence; this is not its purpose, and the text in fact demonstrates why there is no objectively optimal approach in any or all contexts. Instead, it seeks to shed light on aspects of these situations often overlooked in discussions around the fate of nations, and it addresses what the consequences of constitutional paradigm shifts might be for individuals. Constitutional culture is a complex web of interconnected understandings and behaviours, and the vibrations from shaking or cutting a fundamental

strand will be felt throughout the structure
