History of Universities Mordechai Feingold, 2006-10-12 Volume XXI 2 of History of Universities contains the customary mix of learned articles book reviews conference reports and bibliographical information which makes this publication such an indispensable tool for the historian of higher education Its contributions range widely geographically chronologically and in subject matter The volume is as always a lively combination of original research and invaluable reference material **The Wealth of Communities** Matteo Di Tullio, 2016-12-05 The early decades of the sixteenth century were a turbulent time for the Italian peninsula as competing centres of power struggled for political control Nowhere was this more true than the area contested by Milan and Venice that was constantly crossed and occupied by rival armies Investigating the impact of

successive crises upon the inhabitants of the Po Valley this book challenges many fundamental assumptions about the relationship between war and economic development and draws conclusion that have implications for early modern Europe as a whole In traditional historiography periods of war and general crisis have often been regarded as promoting a shift in resources from the communal towards a small number of individuals However through a close micro study of a single region this book offers a different perspective Rather than promoting an aggressive individualism it is argued that in times of general crisis social networks aimed to reproduce themselves and the original status quo by developing creative solutions and institutions favouring co operation Furthermore the elites could not always exploit local wealth because of the need to protect their position of leadership within the community which required the preservation of that very community This thesis not only challenges the received wisdom but also fuels a new debate about the ways in which economic growth occurred in Early Modern Italy and Europe

Origins of a new economic union (7th-12th centuries). Preliminary results of the nEU-Med project: October 2015-March 2017 Giovanna Bianchi, Richard Hodges, 2018-10-11 The nEU Med project is part of the Horizon 2020 programme in the ERC Advanced project category It began in October 2015 and will be concluded in October 2020 The University of Siena is the host institution of the project The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean which took place between the 7th and the 12thc Central to this is an understanding of the processes of change in human settlements in the natural and farming landscapes in relation to the exploitation of resources and in the implementation of differing political strategies This volume brings together the research presented at the first nEUMed workshop held in Siena on 11-12 April 2017 The aim of the workshop was to draw up an initial survey of research and related work on the project one and a half years after its inception The project is composed of several research units Each unit covers an aspect of the interdisciplinary research underpinning the nEU Med project each with their own methodology For this first volume of results it was decided not to give an account of all the work carried out within all the units but to select those lines of investigation which at the end of the first year and a half have made it possible to articulate and develop an interdisciplinary research strategy
