Andrew Hadfield, Paul Hammond

The Matter Of Revolution Science Poetry And Politics In The Age Of Milton:

The Matter of Revolution John Rogers,1996 John Rogers here addresses the literary and ideological consequences of the remarkable if improbable alliance between science and politics in seventeenth century England He looks at the cultural intersection between the English and Scientific Revolutions concentrating on a body of work created in a brief but potent burst of intellectual activity during the period of the Civil Wars the Interregnum and the earliest years of the Stuart Restoration Rogers traces the broad implications of a seemingly outlandish cultural phenomenon the intellectual imperative to forge an ontological connection between physical motion and political action

The Poetics and Politics of Youth in Milton's England Blaine Greteman,2013-08-19 This book argues that concepts of youth and childhood were central to seventeenth century debates about political and poetic voice

Reading, Society and Politics in Early Modern England Kevin Sharpe,Steven N. Zwicker,2003-07-10 This book ranges over private and public reading and over a variety of religious social and scientific communities to locate acts of reading in specific historical moments from the sixteenth through the eighteenth centuries It also charts the changes in reading habits that reflect broader social and political shifts during the period A team of expert contributors cover topics including the processes of book production and distribution audiences and markets the material text the relation of print to performance and the politics of acts of reception In addition the volume emphasises the independence of early modern readers and their role in making meaning in an age in which increased literacy equaled social enfranchisement and interpretation was power Meaning was not simply an authorial act but the work of many hands and processes from editing printing and proofing to reproducing distributing and finally reading

Sonnet Sequences and Social Distinction in Renaissance England Christopher Warley,2005-07-28 Since the 1970s there has been a broad and vital reinterpretation of the nature of literary texts a move away from formalism to a sense of literature as an aspect of social economic political and cultural history While the earliest New Historicist work was criticized for a narrow and anecdotal view of history it also served as an important stimulus for post structuralist feminist Marxist and psychoanalytical work which in turn has increasingly informed and redirected it Recent writing on the nature of representation the historical construction of gender and of the concept of identity itself on theatre as a political and economic phenomenon and on the ideologies of art generally reveals the breadth of the field Cambridge Studies in Renaissance Literature and Culture is designed to offer historically oriented studies of Renaissance literature and theatre which make use of the insights afforded by theoretical perspectives The view of history envisioned is above all a view of our history a reading of the Renaissance for and from our own time Book jacket

Imagining Religious Toleration Alison Conway,David Alvarez,2019-07-15 Formerly a site of study reserved for intellectual historians and political philosophers scholarship on religious toleration from the perspective of literary scholars is fairly limited Largely ignored and understudied techniques employed by writers to influence cultural understandings of tolerance are rich for exploration In investigating

texts ranging from early modern to Romantic Alison Conway David Alvarez and their contributors shed light on what literature can say about toleration and how it can produce and manage feelings of tolerance and intolerance Beginning with an overview of the historical debates surrounding the terms toleration and tolerance this book moves on to discuss the specific contributions that literature and literary modes have made to cultural history studying the literary techniques that philosophers theologians and political theorists used to frame the questions central to the idea and practice of religious toleration Tracing the rhetoric employed by a wide range of authors the contributors delve into topics such as conversion as an instrument of power in Shakespeare the relationship between religious toleration and the rise of Enlightenment satire and the ways in which writing can act as a call for tolerance

The Voluble Soul Richard Willmott, 2021-01-01 The world's fair beauty set my soul on fire In this first study of the full range of Traherne's poetry Richard Willmott explains his metaphysical poetry to all who are attracted by the beauty of his language but puzzled by his meaning He offers guidance both for the student of English uncertain about Traherne's theological ideas and the student of theology put off by seventeenth century poetic conventions and diction Using a wealth of quotation he examines Traherne's verse alongside that of a variety of his contemporaries including Andrew Marvell Lucy Hutchinson Anne Bradstreet and Edward Taylor Central to Traherne's poetry and generous theology is his delight in the capacity of his soul to approach God through an appreciation of His infinite creation This soul is voluble not only because it can express its thoughts with fluency but also because it can enfold within itself the infinity of God's creation taking in everything that it perceives considering the latest scientific speculations about the atom and astronomy but also looking clear sightedly at Restoration society's materialism and in one startlingly savage satire the corruption of the royal court

Early Modern Asceticism Patrick J. McGrath, 2020 Challenging contemporary perceptions of the ascetic in the early modern period this book explores asceticism as a vital site of religious conflict and literary creativity rather than merely a vestige of a medieval past

Possible Knowledge Debapriya Sarkar, 2023-04-04 The Renaissance scholars have long argued was a period beset by the loss of philosophical certainty In Possible Knowledge Debapriya Sarkar argues for the pivotal role of literature what early moderns termed poesis in the dynamic intellectual culture of this era of profound incertitude Revealing how problems of epistemology are inextricable from questions of literary form Sarkar offers a defense of poesis or literary making as a vital philosophical endeavor Working across a range of genres Sarkar theorizes possible knowledge as an intellectual paradigm crafted in and through literary form Sixteenth and seventeenth century writers such as Spenser Bacon Shakespeare Cavendish and Milton marshalled the capacious concept of the possible defined by Philip Sidney as what may be and should be to construct new theories of physical and metaphysical reality These early modern thinkers mobilized the imaginative habits of thought constitutive to major genres of literary writing including epic tragedy romance lyric and utopia in order to produce knowledge divorced from historical truth and empirical fact by envisioning states of being untethered from nature or reality Approaching imaginative modes such as

hypothesis conjecture prediction and counterfactuals as instruments of possible knowledge Sarkar exposes how the speculative allure of the possible lurks within scientific experiment induction and theories of probability In showing how early modern literary writing sought to grapple with the challenge of forging knowledge in an uncertain perhaps even incomprehensible world Possible Knowledge also highlights its most audacious intellectual ambition its claim that while natural philosophy or what we today term science might explain the physical world literature could remake reality Enacting a history of ideas that centers literary studies Possible Knowledge suggests that what we have termed a history of science might ultimately be a history of the imagination

Taste Denise Gigante, 2008-10-01 div What does eating have to do with aesthetic taste While most accounts of aesthetic history avoid the gustatory aspects of taste this book rewrites standard history to uncover the constitutive and dramatic tension between appetite and aesthetics at the heart of British literary tradition From Milton through the Romantics the metaphor of taste serves to mediate aesthetic judgment and consumerism gusto and snobbery gastronomes and gluttons vampires and vegetarians as well as the philosophy and physiology of food The author advances a theory of taste based on Milton's model of the human as consumer and digester of food words and other commodities a consumer whose tasteful subliminal self remains haunted by its own corporeality Radically rereading Wordsworth's feeding mind Lamb's gastronomical essays Byron's cannibals and other deviant diners and Kantian nausea Taste resituates Romanticism as a period that naturally saw the rise of the restaurant and the pleasures of the table as a cultural field for the practice of aesthetics DIV
