The Mechanical Song Women Voice And The Artificial In Nineteenth Century French Narrative:

The Mechanical Song Felicia Miller-Frank, 1995-09-01 Examining the privileged relation of women to the singing voice in nineteenth century literary works the author argues for an emerging identification between women and artifice in the period Beginning with texts by Rousseau and Proust that show a link between nostalgia for the maternal voice and the writer's self the book then turns to the psychoanalytic literature on the role of the voice in the formation of the psyche In the process it analyses feminist polemics on the maternal voice to show how voice and rhythm together form the matrices of the subject The voice of the soprano occupied a special place in nineteenth century operatic history replacing the castrato voice as a sexless angelic ethereal source of pleasure for the opera goer The author shows how these qualities are identified with women's voices in literary texts by Sand Balzac du Maurier and Nerval

Women's Writing in Nineteenth-Century France Alison Finch, 2000-08-10 This is the most complete critical survey to date of women's literature in nineteenth century France Alison Finch's wide ranging analysis of some 60 writers reflects the rich diversity of a century that begins with Mme de Staël's cosmopolitanism and ends with Rachilde's perverse eroticism Finch's study brings out the contribution not only of major figures like George Sand but also of many other talented and important writers who have been unjustly rejected including Flora Tristan Claire de Duras and Delphine de Girardin Her account opens new perspectives on the interchange between male and female authors and on women's literary traditions during the period She discusses popular and serious writing fiction verse drama memoirs journalism feminist polemic historiography travelogues children's tales religious and political thought often brave innovative texts linked to women's social and legal status in an oppressive society Extensive reference features include bibliographical guides to texts and writers

Female Singers on the French Stage, 1830-1848 Kimberly White, 2018-05-24 The study of singers' art has emerged as a prominent area of inquiry within musicology in recent years *Female Singers on the French Stage 1830-1848* shifts the focus from the artwork onstage to the labour that went on behind the scenes Through extensive analysis of primary source documents Kimberly White explores the profession of singing operatic culture and the representation of female performers on the French stage between 1830 and 1848 and reveals new perspectives on the social economic and cultural status of these women The book attempts to reconstruct and clarify contemporary practices of the singer at work including vocal training and rehearsals and performance schedules touring benefit concerts and retirement as well as the strategies utilized in publicity and image making Dozens of case studies many compiled from singers' correspondence and archival papers shed light on the performers' successes and struggles at a time when Paris was the operatic centre of Europe

Female Performers in British and American Fiction Barbara Straumann, 2018-05-22 The female performer with a public voice constitutes a remarkably vibrant theme in British and American narratives of the long nineteenth century The tension between fictional female performers and other textual voices can be seen to refigure the cultural debate over the voice of women in aesthetically complex ways By focusing on singers

actresses preachers and speakers this book traces and explores an important tradition of feminine articulation Drawing on critical approaches in literary studies gender studies and philosophy the book conceptualizes voice for the discussion of narrative texts Examining voice both as a thematic concern and as an aesthetic effect the individual chapters analyse how the actual articulation by female performers correlates with their cultural visibility and agency What this study foregrounds is how women characters succeed in making themselves heard even if their voices are silenced in the end **Musical Women**

in England, 1870-1914 NA NA,2000-07-07 Musical Women in England 1870 1914 delineates the roles women played in the flourishing music world of late Victorian and early twentieth century England and shows how contemporary challenges to restrictive gender roles inspired women to move into new areas of musical expression both in composition and performance The most famous women musicians were the internationally renowned stars of opera greatly admired despite their violations of the prescribed Victorian linkage of female music making with domesticity the divas were often compared to the sirens of antiquity their irresistible voices a source of moral danger to their male admirers Their ambiguous social reception notwithstanding the extraordinary ability and striking self confidence of these women and of pioneering female soloists on the violin long an instrument permitted only to men inspired fiction writers to feature musician heroines and motivated unprecedented numbers of girls and women to pursue advanced musical study Finding professional orchestras almost fully closed to them many female graduates of English conservatories performed in small ensembles and in all female and amateur orchestras and sought to earn their living in the overcrowded world of music teaching **Sounding Bodies** Ann

Cahill,Christine Hamel,2021-08-26 In compelling and intricately argued ways the authors make a resounding case for understanding how vocal sonority is intrinsic to self identity and self reception Required Reading Jane Boston Principal Lecturer Voice Studies Royal Central School of Speech and Drama A new provocative study of the ethical political and social meanings of the everyday voice Utilising the framework of feminist philosophy authors Ann J Cahill and Christine Hamel approach the phenomenon of voice as a lived sonorous and embodied experience marked by the social structures that surround it including systemic forms of injustice such as ableism sexism racism and classism By developing novel theoretical constructs such as intervocality and respiratory responsibility Cahill and Hamel cut through the static between theory and praxis and put forward exciting theories on how human vocal sound can perpetuate and challenge persistent inequalities Sounding Bodies presents a powerful model of how the seemingly disparate disciplines of philosophy and voice speech training can in conversation with each other generate illuminating insights about our vocal lives and identities *Artificial*

Humanities Nina Beguš,2025-11-25 Artificial Humanities explores how literature history and art can deepen our understanding of artificial intelligence and its development By examining fictional representations of AI in parallel with actual technological developments Nina Begu presents a novel interdisciplinary framework for understanding the cultural philosophical and ethical dimensions of AI She traces connections from Eliza Doolittle to ELIZA the chatbot and current

language models incorporates Slavic fictional examples from the Pygmalion paradigm and compares mid century science fiction and recent Hollywood films with contemporary developments in social robotics and virtual beings Highlighting the impact of human like AI design from gendered virtual assistants to romanticized social robots the book shows how these technologies intersect with longstanding humanistic questions about the concepts of creativity and language as well as the relations between humans and machines Additionally the book explores AI s applications in medical fields particularly psychiatry and neurotechnology including how AI interacts with the human body and mind to address conditions like paralysis By emphasizing the philosophical and cultural implications of these technologies Begu highlights the need for responsible innovation that prioritizes human well being as well as machine potential outside of human imitation Accessible and thought provoking Artificial Humanities offers tools for analyzing and assessing technologies while they are being developed and invites readers to see how the humanities can guide us toward a more thoughtful future for AI

Reconstructing Woman Dorothy Kelly,2010-11 *Reconstructing Woman* explores a scenario common to the works of four major French novelists of the nineteenth century Balzac Flaubert Zola and Villiers In the texts of each author a new Pygmalion as Balzac calls one of his characters turns away from a real woman he has loved or desired and prefers instead his artificial re creation of her All four authors also portray the possibility that this simulacrum which replaces the woman could become real The central chapters examine this plot and its meanings in multiple texts of each author with the exception of the chapter on Villiers in which only L Eve future is considered The premise is that this shared scenario stems from the discovery in the nineteenth century that humans are transformable Because scientific innovations play a major part in this discovery Dorothy Kelly reviews some of the contributing trends that attracted one or more of the authors mesmerism dissection transformism and evolution new understandings of human reproduction spontaneous generation puericulture the experimental method These ideas and practices provided the novelists with a scientific context in which controlling changing and creating human bodies became imaginable At the same time these authors explore the ways in which not only bodies but also identity can be made In close readings Kelly shows how these narratives reveal that linguistic and coded social structures shape human identity Furthermore through the representation of the power of language to do that shaping the authors envision that their own texts would perform that function The symbol of the reconstruction of woman thus embodies the fantasy and desire that their novels could create or transform both reality and their readers in quite literal ways Through literary analyses we can deduce from the texts just why this artificial creation is a woman *The Audible Past* Jonathan Sterne,2003-03-13 Table of contents [Art and the Transitional Object in Vernon Lee's Supernatural Tales](#) Patricia Pulham,2017-03-02 In her persuasively argued study Patricia Pulham astutely combines psychoanalytic theory with socio historical criticism to examine a selection of fantastic tales by the female aesthete and intellectual Vernon Lee Violet Paget 1856 1935 Lee s own definition of the supernatural in the preface to *Hauntings* questions the nature of the genuine ghost

and argues that this figure is not found in the Society of Psychical Research but in our own psyches where it functions as a mediator between past and present Using D W Winnicott s transitional object theory which maintains that adults transfer their childhood engagement with toys to art and cultural artifacts Pulham argues that the prevalence of the past in Lee s tales signifies not only an historical but a psychic past Thus the ghosts that haunt Lee s supernatural fiction as well as her aesthetic psychological and historical writings held complex meanings for her that were fundamental to her intellectual development and allowed her to explore alternative identities that permit the expression of transgressive sexualities
