The Meek and the Militant Paul N. Siegel, 2005 An invaluable critical analysis of how religion shapes politics encouraging both submission and at times revolution **A Companion to Europe Since 1945** Klaus Larres, 2014-01-28 A Companion to Europe Since 1945 provides a stimulating guide to numerous important developments which have influenced the political economic social and cultural character of Europe during and since the Cold War Includes 22 original essays by an international team of expert scholars Examines the social intellectual economic cultural and political changes that took place throughout Europe in the Cold War and Post Cold War periods Discusses a wide range of topics including the Single Market European American relations family life and employment globalization consumption political parties European decolonization European identity security and defence policies and Europe s fight against international terrorism Presents Europe in a broad geographical conception to give equal weighting to developments in the Eastern and Western European states **A Companion to Atheism and Philosophy** Graham Oppy, 2019-03-22 PROSE 2020 Single Volume Reference Finalist Philosophers throughout history have debated the existence of gods but it is only in recent years that the absence of such a belief has become a significant topic of philosophical analysis in particular for philosophers of religion Although it is difficult to trace the historical contours of atheism as the lack of belief in a higher power the reasoned reflective and thoughtful rejection of theism has become commonplace in many modern intellectual circles including academic philosophy where disciplinary data indicates that a large majority of philosophers self identify as atheists As the first book of its kind to bring together a collection of writing on the philosophical aspects of atheism both historical and contemporary the Companion to Atheism and Philosophy stages an explicit constructive and comprehensive conversation between philosophy and atheism to examine the ways in which atheist thought intersects with ideas and positions from a variety of philosophical and theological sub disciplines The Companion begins by addressing the foundational questions and lingering controversies which underpin philosophical thought about atheism exploring the implications of major developments in the history of philosophy for the modern atheistic worldview Divided into eight distinct sections essays consider a range of thinkers who were widely believed to have been atheists including David Hume Mary Wollstonecraft Karl Marx and Elizabeth Cady Stanton and survey different kinds of objections to theism and atheism including logical evidential normative and prudential Later chapters trace the relationship between atheism and metaphysics epistemology ethics and political philosophy oriented around topics such as pragmatism postmodernism freedom education violence and happiness Deftly curated and thoughtfully composed A Companion to Atheism and Philosophy is the most ambitious and authoritative account of philosophical thinking on atheism available and is a first rate resource for academics professionals and students of philosophy religious studies and theology *Critical Realism and Marxism* Andrew Brown, Steve Fleetwood, John Michael Roberts, 2003-09-02 This book examines the relationship between critical realism and Marxism The authors argue that critical realism and Marxism have much to gain

from each other This is the first book to address the controversial debates between critical realism and Marxism and it does so from a wide range of disciplines The authors argue that whilst one book cannot answer all the questions about the relationship between critical realism and Marxism this book does provide some significant answers In doing so Critical Realism and Marxism reveals a potentially fruitful relationship deepens our understanding of the social world and makes an important contribution towards eliminating the barbarism that accompanies contemporary capitalism *Emergentist*

Marxism Sean Creaven, 2013-04-15 In tackling emergentist Marxism in depth this well written volume demonstrates that critical realism and materialist dialectics are indispensable to theorizing the functioning of complex social and physical systems Author Sean Creaven investigates Marx's dialectics of being and consciousness forces and relations of production base and superstructure class structure and class conflict and demonstrates how they allow the social analyst to conceptualize geo history as embodying a tendential evolutionary directionality rather than as simply random or indeterminate in terms of its outcomes For those interested in social and political theory Marxism and communism and contemporary social theory this outstanding volume is an important read and a valuable resource Manufacturing Religion

Russell T. McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade's life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field's object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly disserve but actively inhibit the emergence of critical perspectives and capacities And on the geopolitical scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism **Understanding Religious**

Violence J.P. Larsson, 2017-07-05 There is a long standing fear of that which is not understood Since September 11 2001 the fear surrounding the violent elements of religion has led to heightened tensions Research is thus essential to counteract the effects of religious xenophobia In this compelling book J P Larsson investigates religious violence terrorism and armed conflict in order to deliver the understanding required for a more peaceful world and to allow for a framework of conflict transformation This multi disciplinary text will greatly interest those in the fields of international relations theology and

sociology **Israel, Palestine and the Politics of Race** Yasmeeen Abu-Laban, Abigail B. Bakan, 2019-10-31 As the situation in Israel Palestine seems to become ever more intractable and protracted the need for new ways of looking at recent developments and their historical roots is more pressing than ever Bearing this in mind Yasmeeen Abu Laban and Abigail B Bakan discuss the historic and contemporary dynamics in Israel Palestine and their international reverberations from the unique vantage point of race racialization racism and anti racism They therefore offer close analysis of the idea of Israel and the absence of Palestine by examining the concepts of race and identity in the region With fresh coverage of themes relating to gender Idigeneity the environment surveillance and the war on terror Israel Palestine and the Politics of Race will appeal to scholars in political science sociology and Middle East studies *Democracy* Ricardo Blaug, 2016-02-28 Put together specially for students of democracy this invaluable reader gathers key statements from political thinkers explained and contextualised with editorial commentaries This new edition includes a new introduction new sections and 29 new readings published since the first edition Arranged into four sections Traditional Affirmations of Democracy Key Concepts Critiques of Democracy and Contemporary Issues it covers democratic thinking in a remarkably broad way A general introduction highlights democracy s historical complexity and guides you through the current areas of controversy The extensive bibliography follows the same structure as the text to help you deepen your study Max Weber Kieran Allen, 2004-06-20 Max Weber is one of the founding fathers of sociology He is often referred to as a sophisticated value free sociologist This new critical introduction argues that Weber s sociology cannot be divorced from his political standpoint Weber saw himself as a class conscious bourgeois and his sociology reflects this outlook Providing clear summaries of Weber s ideas concentrating on the themes most often encountered on sociology courses Kieran Allen provides a lively introduction to this key thinker Kieran Allen explores Weber s political background through his life and his writing Weber was a neo liberal who thought that the market guaranteed efficiency and rationality He was an advocate of empire He supported the carnage of WW1 and vehemently attacked German socialists such as Rosa Luxemburg Weber s most famous book *The Protestant Ethic and the Spirit of Capitalism* ignores the bloody legacy associated with the early accumulation of capital Instead he locates the origins of the system in a new rigorous morality Using a political framework Kieran Allen s book is ideal for students who want to develop a critical approach
