The Memory Of History:

Memory and History Joan Tumblety, 2013-07-15 How does the historian approach memory and how do historians use different sources to analyze how history and memory interact and impact on each other Memory and History explores the different aspects of the study of this field Taking examples from Europe Australia the USA and Japan and treating periods beyond living memory as well as the recent past the volume highlights the contours of the current vogue for memory among historians while demonstrating the diversity and imagination of the field Each chapter looks at a set of key historical and historiographical questions through research based case studies How does engaging with memory as either source or subject help to illuminate the past What are the theoretical ethical and or methodological challenges that are encountered by historians engaging with memory in this way and how might they be managed How can the reading of a particular set of sources illuminate both of these questions The chapters cover a diverse range of approaches and subjects including oral history memorialization and commemoration visual cultures and photography autobiographical fiction material culture ethnic relations the individual and collective memories of war veterans The chapters collectively address a wide range of primary source material beyond oral testimony photography monuments memoir and autobiographical writing fiction art and woodcuttings everyday and exotic cultural artefacts journalism political polemic the law and witness testimony This book will be essential reading for students of history and memory providing an accessible guide to the historical study of memory through a focus on varied source materials

History and memory Geoffrey Cubitt, 2013-01-18 In recent years memory has become a central though also a controversial concept in historical studies a term that denotes both a new and distinctive field of study and a fresh way of conceptualizing history as a field of inquiry more generally This book which is aimed both at specialists and at students provides historians with an accessible and stimulating introduction to debates and theories about memory and to the range of approaches that have been taken to the study of it in history and other disciplines Contributing in a wide ranging way to debate on some of the central conceptual problems of memory studies the book explores the relationships between the individual and the collective between memory as survival and memory as reconstruction between remembering as a subjective experience and as a social or cultural practice and between memory and history as modes of retrospective knowledge

Writing the History of Memory Stefan Berger, How objective are our history books This addition to the Writing History series examines the critical role that memory plays in the writing of history The volume includes essays from an international team of historians bringing together analysis of forms of public history such as museums exhibitions memorials and speeches coverage of the ancient world to the present on topics such as oral history and generational and collective memory and two key case studies on Holocaust memorialization and the memory of Communism From Amazon com

The Memory Phenomenon in Contemporary Historical Writing Patrick H. Hutton, 2016-07-15 In this book the author provides a comprehensive overview of the intense and sustained work on the relationship between

collective memory and history retracing the royal roads pioneering scholars have traveled in their research and writing on this topic notably the politics of commemoration purposes and practices of public remembrance the changing uses of memory worked by new technologies of communication from the threshold of literacy to the digital age the immobilizing effects of trauma upon memory with particular attention to the remembered legacy of the Holocaust He follows with an analysis of the implications of this scholarship for our thinking about history itself with attention to such issues as the mnemonics of historical time and the encounter between representation and experience in historical understanding His book provides insight into the way interest in the concept of memory as opposed to long standing alternatives such as myth tradition and heritage has opened new vistas for scholarship not only in cultural history but also in shared ventures in memory studies in related fields in the humanities and social sciences Memory and History in George Eliot Hao Li, 2000-04-18 This book explores the interrelations between communal memory and the sense of history in George Eliot's novels by focusing on issues such as memory and narrative memory and oblivion memory and time and the interactions between personal communal and national memories Hao Li offers a fresh critical reading informed by major nineteenth century theories and argues for a reappraisal of George Eliot's complex understanding of the dialects of memory and history an understanding that both integrates and transcends the positivist and the romantic historical approaches of her time **Memory, Trauma, and History** Michael S. Roth, 2011-11-01 In these essays Michael S Roth uses psychoanalysis to build a richer understanding of history and then takes a more expansive conception of history to decode the cultural construction of memory He first examines the development in nineteenth century France of medical criteria for diagnosing memory disorders which signal fundamental changes in the understanding of present and past He next explores links between historical consciousness and issues relating to the psyche including trauma and repression and hypnosis and therapy Roth turns to the work of postmodern theorists in connection with the philosophy of history and then examines photography's capacity to capture traces of the past He considers how we strive to be faithful to the past even when we don't care about getting it right or using it productively Roth concludes with essays defending pragmatic and reflexive liberal education Drawing on his experiences as a teacher and academic leader he speaks of living with the past without being dominated by it History as an Art of Memory Patrick H. Hutton, 1993 Hutton considers the ideas of philosophers poets and historians to seek out the roots of fact as mere recollection **The Concept of History** Dmitri Nikulin, 2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out It is a critique of the modern understanding of history that presents it as universal and teleological progressively moving forward to an end Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history the remnants of these positions still affect our understanding of history But if history is not universal and singular evolving toward an objective universal end it should be possible to admit of multiple histories some of which we

appropriate as our own. Another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity. The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history.

Memory, History, Nation Susannah Radstone, 2017-09-04

In the last decade a focus on memory in the human sciences has encouraged new approaches to the study of the past. As the humanities and social sciences have put into question their own claims to objectivity, authority and universality, memory has appeared to offer a way of engaging with knowledge of the past as inevitably partial, subjective and local. At the same time, memory and memorial practices have become sites of contestation and the politics of memory are increasingly prominent. This interdisciplinary volume demonstrates from a range of perspectives the complex cultural work and struggles over meaning that lie at the heart of what we call memory. The chapters in this volume offer a complex awareness of the workings of memory and the ways in which different or changing histories may be explained. They explore the relation between individual and social memory, between real and imaginary event and fantasy, history and myth. Contradictory accounts or memories in direct contradiction to the historical record are not always the sign of a repressive authority attempting to cover something up. The tension between memory as a safeguard against attempts to silence dissenting voices and memory's own implication in that silencing runs throughout the book. Topics covered range from the Basque country to Cambodia, from Hungary to South Africa, from the Finnish Civil War to the cult Jim Jarmusch movie *Dead Man*, from the Rock and Roll Hall of Fame to Australia.

Part I: Transforming Memory is concerned primarily with the social and personal transmission of memory across time and generations. Part II: Remembering Suffering, Trauma and History brings the after-effects of catastrophe to the fore. Part III: Patterning the National Past: the relation between nation and memory is the central issue. Part IV: And Then Silence reflects on the complex and multiple meaning of silence and oblivion, wherein amnesia is often used as a figure for the denial of shameful.

Writing the History of Memory Stefan Berger, Bill Niven, 2014-02-13

How objective are our history books? This addition to the *Writing History* series examines the critical role that memory plays in the writing of history. This book includes essays from an international team of historians bringing together analysis of forms of public history such as museums, exhibitions, memorials and speeches. Coverage of the ancient world to the present on topics such as oral history and generational and collective memory. Two key case studies on Holocaust memorialisation and the memory of Communism.
