The Military And Society:

The Military and Society David MacIsaac, 1975 **Reconsidering American Civil-Military Relations** Lionel Beehner, Risa Brooks, Daniel Maurer, 2020-11-16 The United States professionalized military is subordinated to civilian control. This text looks at that relationship by considering how social media, changing means of warfare, deepening political divisions, and an increasingly unpredictable operational environment have affected the organization of what is conventionally assumed to be an apolitical profession. Through chapters written by respected civil-military relations scholars, military professionals, and policymakers, the work argues that modern means and methods of warfare, not to mention evolving norms on the use of force, are reshaping the contours of what it means to be professional and what healthy civil-military relations look like in practice.

The Military and Society United States Air Force Academy. Library, 1972 **The Military in the Service of Society and Democracy** Daniella Ashkenazy, 1994-04-30 This volume examines civil-military relations in general and nonmilitary functions in the service of society and democracy in particular in six different nations against the backdrop of the Israeli experience with a dual role military. Since its inception, the Israeli Defense Force (IDF) has functioned as a very effective fighting force while also fulfilling many core nonmilitary roles as a powerful educational and remedial agent engaged in strengthening the fabric of Israeli society. The inner workings of the IDF in this area, the subject and dynamics of its broad social agenda, including the dilemmas inherent in education toward broad intellectual autonomy within a regimented system such as the military, are presented for the first time before a non-Israeli audience in detail and with much candor by both high echelon IDF personnel and junior officers in conscript service directly responsible for carrying out these missions.

The military and society : the proceedings... Military History Symposium. 5. 1972. Colorado Springs, Colo., 1975 Handbook of the Sociology of the Military Giuseppe Caforio, Marina Nuciari, 2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003. It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so-called cyborg warriors, new forms of leadership and changes in soldier's identity and organisational culture. It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study. Covered in this volume is a historical excursus of studies prior to contemporary research, interpretive models and theoretical approaches developed specifically for this topic: civil-military relations including issues surrounding democratic control of the armed forces, military culture, professional training conditions and problems of minorities in the armed forces, an examination of the structural change within the military over the years including new duties and functions following the Cold War.

Military and Society in Post-Soviet Russia Stephen L. Webber, Jennifer G. Mathers, 2006 This collection provides the first comprehensive analysis of the nature of the relationship between the military and society in post-Soviet

Russia It brings together a multidisciplinary group of leading Western and Russian experts to investigate both the ways in which developments in the Russian armed forces influence Russian society and the impact of broader societal change on the military sphere *Military and Society in 21st Century Europe* Jürgen Kuhlmann, Jean Callaghan, 2000 After the Cold War came to an end European countries in both East and West faced the common question of how their military organizations and those of their neighbors would respond to shifts in international relations affecting their economies their perception of globalized threats and cross national security management It is undisputed for example that in well developed democratic societies the challenge to the legitimacy of the military in society the decreasing subjective apprehension of threat and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards This volume seeks by empirically measuring social indicators to assess the current state of civil military relations in a number of countries in Eastern Europe Bulgaria Czech Republic Hungary Romania Russia as well as the state of relations in several of their Western European counterparts France Germany Italy the Netherlands The country studies describe and analyze the differing positions of the military in their specific national settings The Military and Society , **The Military and Society** David MacIsaac, 2002 The study of the relationship between professional military establishments and their parent societies is an aspect of military affairs which has acquired new significance in comparatively recent times Before World War II the role of the military man in both liberal and authoritarian societies was more or less clearly defined For the most part in liberal societies the professional military man's role was episodic When called upon he performed the role of defender of the society he represented but on the whole remained forgotten and isolated In the more authoritarian societies and to a certain degree in the developing nations of the world the opposite was true the political and social position of the military was nearly impregnable In the latter half of the twentieth century however the traditional role of force in international relations is no longer automatically accepted Perhaps more than ever the position and role of the military in society most notably American society is being questioned It would seem that in this changed environment much could be gained by studying in perspective the relationship between the military and society not only in this country but also in other selected areas of the world To this end the Fifth Military History Symposium of the U S Air Force Academy focused on an analysis of the impact of the military on developing societies as compared to its impact and influence upon developed societies Within the context of this larger question we looked at the role of the military as a pacesetter and catalyst in social experimentation Hopefully from this type of an examination we can arrive at some conclusions about the role of the military in a changing society
