The Media And Modernity:

The Media and Modernity John B. Thompson, 1995 What role have communication media played in the formation of modern societies How should we understand the social impact of new forms of communication and information diffusion from the advent of printing in fifteenth century Europe to the expansion of global communication networks today In this major new work Thompson addresses these and other questions by elaborating a distinctive social theory of communication media and their impact He argues that the development of communication media has transformed the spatial and temporal constitution of social life creating new forms of action and interaction which are no longer linked to the sharing of a common locale The consequences of this transformation are far reaching and impinge on many aspects of our lives from the most intimate aspects of personal experience and self formation to the changing nature of power and visibility in the public domain Combining breadth of vision with sensitivity to detail this book situates the study of the media where it belongs among a set of disciplines concerned with the emergence development and structural characteristics of modern societies and their futures

Emancipation, the Media, and Modernity : Arguments about the Media and Social Theory Nicholas Garnham, 2000-04-06 This book adopts a polemical stance It approaches the problems raised by the media by way of a set of arguments with the two dominant paradigms now current for thinking about the media DSp post modernism and Information Society theory It argues that the media are important because they raise a set of questions that have been central to social and political theory since the Enlightenment In a series of probes into different sets of questions raised by the media the argument of the book focuses on the problem raised by what Kant called the unsocial sociability of human kind Under what conditions could autonomous free individuals live in viable social communities Or to put it another way what are the related scope for and limits on human reason and emancipation In conducting this argument the book first argues for a necessarily historical perspective It then goes on to examine the implications for emancipation of seeing the media as cultural industries within the wider systems world of the capitalist market economy of seeing the media as technologies of the specialisation of intellectual production and of the separation and increasing social distance between the producers and consumers of symbols It then goes on to argue against current ethnographic trends in audience research and against the focus on everyday life for a reinstatement of interest in the statistical reality of audiences and effects and for a recognition through a return to the Hegelian roots of commodity fetishism and the symbolic interactionist creation of identities that an active audience can be actively involved in its own domination The argument then turns to the problem of how we evaluate the symbolic forms that the media circulate and whether such evaluation can be anything more than a matter of personal taste It is argued that evaluation is in practice unavoidable and without some standards that are more than just subjective

any criticism of the medias performance is impossible Via an examination of the debate between the sociology of art and aesthetics it argues for the ethical foundations of aesthetic judgement and for the establishment of agreed standards of aesthetic judgement via the discourse ethic that underlies the argument of the entire book This foregrounding of the discourse ethic then leads on to a discussion of the media and politics Here the argument is that arguments about the media and politics are at the heart of arguments about politics itself These arguments focus it is argued upon the shifting division between the public and the private Here the book returns to the roots of public sphere theory in Rousseaus arguments for the centrality of public spectacle and Kants argument for the centrality of public reason in the practice of democratic politics

Muslims, Minorities, and the Media Laurens de Rooij,2023-03-01 Inspired by overtly negative coverage by the Western mainstream press of Muslims in particular and minorities in general this book asks Why are negative narratives and depictions of Muslims and other minorities so hard to change News reports about Islam and Muslims commonly relate

stories that discuss terrorism violence or other unwelcome or irrational behaviour or the lack of integration and compatibility of Muslims and Islam with Western values and society Yet there is little research done on how studies on media reports about minorities seemingly fail to improve the situation Combining empirical research with a structural analysis of the media industry this volume presents evidence for the maligned representation of minorities by media corporations analysing why negative narratives persist and outlining how these can be effectively transformed It is an outstanding resource for students and scholars of media religion culture sociology and Islamic studies and is also of benefit for journalists media representatives and activists looking to effect change for minority representation in the media industry specifically or in society at large

Mediated Ideologies: Nordic Views on the History of the Press and Media Cultures Jukka Kortti, Heidi Kurvinen, 2024-07-16 Ideologies have not been a focus of interest in the field of humanities and social sciences in recent decades but rethinking the power of ideologies in the media sphere has recently returned to the scholarly discussion The compilation book *Mediated Ideologies Nordic Views on the History of the Press and Media Cultures* participates in this by providing selected yet justified approaches to media history from the point of view of ideological uses of media in the Nordic region In this book the role of media comprising both popular media and news journalism as a forum for ideologies and their circulation will be analyzed by focusing on the Nordic region The perceived similarities in the media systems of the Nordic countries constitute a perfect extent for a regional media history against not only a European but also a global backdrop This does not mean that there have not been many national differences The book does not provide a chronological narrative of Nordic media history Still the ideology of media is approached not only from the standpoints of different media forms film television newspapers magazines and periodicals but also from several historical periods from the mid 19th century to the late 20th century The chapters show the multidimensional role that the media has in transmitting ideologies to their audiences and the public sphere They also demonstrate that analyzing the role of different ideologies such as modernization nationalism solidarity feminism and peace movement in media history provides wider perspectives in understanding past and present media landscapes and people's mediated experiences that are fostered by them *Mediated Ideologies Nordic Views on the History of the Press and Media Cultures* can be used both as a reference book and as a classroom adaption in the field of media communication and history studies
