

THE SCIENTIFIC METHOD

The scientific method is the process of objectively establishing facts through testing and experimentation.

By using a standardized approach in their investigations, scientists can feel confident that they will stick to the facts and limit the influence of personal, preconceived notions.

The steps for the scientific method are:

1. Ask a question
2. Research
3. Create a hypothesis
4. Make a plan
5. Experiment
6. Collect and record results
7. Draw conclusions
