Sociology of the Middle East Nieuwenhuijze, 2022-09-12 Cultural Sociology of the Middle East, Asia, and Africa Andrea L. Stanton, Edward Ramsamy, Peter J. Seybolt, Carolyn M. Elliott, 2012-01-05 In our age of globalization and multiculturalism it has never been more important for Americans to understand and appreciate foreign cultures and how people live love and learn in areas of the world unfamiliar to most U S students and the general public The four volumes in our cultural sociology reference encyclopedia take a step forward in this endeavor by presenting concise information on those regions likely to be most foreign to U S students the Middle East Asia and Africa The intent is to convey what daily life is like for people in these selected regions It is hoped entries within these volumes will aid readers in efforts to understand the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions Sociology of the Middle East C.a. Nieuwenhuijze, 1971-12 The Oxford Handbook of the Sociology of the Middle East Armando Salvatore, Sārī Ḥanafī, Kieko Obuse, 2022 The Oxford Handbook of the Sociology of the Middle East integrates the study of the social dynamics in the Middle East within history culture and politics The volume transcends a purely regional perspective to investigate the global nature of these dynamics and their impact on the life of people in the region It provides a comprehensive perspective in connecting the vexed state society relations in the region with movements of transformation and the affirmation of rights and creativity in the public arenas **The Oxford Handbook of the Sociology of the Middle East** Armando Salvatore, Sārī Ḥanafī, Kieko Obuse, 2022 Book Abstract The sociology of the Middle East has been an expanding field of inquiry since the aftermath of WWII when phenomena as diverse as urbanization internal and international migration and peasant societies attracted the attention of scholars working on the region The Middle East became central in key sociological debates on modernization theory and the critical responses The Oxford Handbook of the Sociology of the Middle East connects this historical trajectory with the emergence of the sociology of Islam inspired by Max Weber It explores how within the global community the Middle East has become a terrain of heightened concern within the post Cold War context where the promising rise of civic and often religiously inspired sociopolitical movements in the 1980s and 1990s has been slowly overwhelmed by the affirmation of jihadist networks authoritarian states and complex supranational security apparatuses This foundational volume starts by engaging in a critical examination of the field itself starting with a historical sociology of the making of the idea itself of the Middle East and linking it with the legacy of colonialism and the evolving dynamics of global power In repurposing the sociology of the Middle East within a growing interdisciplinary multifield the Handbook develops the critical argument that the exploration of social dynamics in the Middle East cannot be disjoined from the analysis of culture and politics By connecting the vexed state society relations in the region with movements of transformation and the affirmation of rights and creativity in the public arenas it provides a comprehensive perspective to investigate longstanding regional and new

transregional and global dynamics and their impact on the life of people in the region Keywords sociology of the Middle East sociology of Islam Max Weber historical sociology Middle East and North Africa region MENA *The Middle East* Professor Shahrough Akhavi,2009-10-15 Amidst recent hype about events in the Middle East there have been few attempts to get below the surface and develop a fuller understanding of what politics means there *The Middle East The Politics of the Sacred and Secular* redresses this balance and provides essential historical and theoretical context In this book Shahrough Akhavi shows that the way people think about politics in the Middle East has developed in response to historical experience Islam has obviously played a pivotal role and the book does much to disentangle myth and reality about Islamic responses to politics Refreshingly however the book focuses on the universal concepts of the individual civil society the state justice authority and obligation and how these have been interpreted by Middle Eastern thinkers in the twentieth and twenty first centuries Akhavi builds a dynamic picture of a politically exciting and engaged region The fresh perspective this book brings to global political theory and the background it gives students of politics in the Middle East make it an important addition to the World Political Theories series **State and Economics in the Middle East** Alfred Bonne,2013-09-05 This is Volume XVI of eighteen in series on the Sociology of Development Originally published in 1948 this study looks at the Middle East as a society in transition in terms of its state and economics Written during the early war period the book covers developments only up to that date **The I.B. Tauris Handbook of Sociology and the Middle East** Fatma Müge Göçek,Gamze Evcimen,2022-11-17 What we understand by the Middle East has changed over time and across space While scholars agree that the geographical core of the Middle East is the Arabian Peninsula the boundaries are less clear How far back in time should we go to define the Middle East How far south and east should we move on the African continent And how do we deal with the minority religions in the region and those who migrate to the West Across this handbook s 52 chapters the leading sociologists writing on the Middle East share their standpoint on these questions Taking the featured scholars as constitutive of the field the handbook reshapes studies on the region by piecing together our knowledge on the Middle East from their path defining contributions The volume is divided into four parts covering sociologists perspectives on Social transformations and social conflict from Israel Palestine and the Iranian Revolution to the Arab Uprisings and the Syrian War The region s economic religious and political activities including the impact of the spread of Western modernity the effects of neo liberalism and how Islam shapes the region s life and politics People s everyday practices as they have shaped our understanding of culture consumption gender and sexuality The diasporas from the Middle East in Europe and North America which put the Middle East in dialogue with other regions of the world The global approach and wide ranging topics represent how sociologists enable us to redefine the boundaries and identities of the Middle East today *Cultural Sociology of the Middle East, Asia, and Africa* Andrea L. Stanton,2012 In our age of globalization and multiculturalism it has never been more important to understand and appreciate all cultures across the world The four volumes take a step forward

in this endeavour by presenting concise information on those regions least well known to students across Europe the Middle East Asia and Africa The volumes convey what daily life is like for people in these selected regions Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions Key Features Topics are explored within historical context in three broad historical periods prehistory to 1250 1250 to 1920 and 1920 to the present One volume each is devoted to the regions of the Middle East and Africa and then one volume to East and Southeast Asia and a final volume to West Central and South Asia The volumes include extensive use of photographs and maps to explain cultural and geographic content Each volume has its own volume editor with expertise in that particular region Key Themes Arts Culture and Science People Society and Dynasties Religion and Law Family and Daily Life Conflicts and Wars Politics and Government Health and Education Economy Trade and Industry National Geography and History

War, Institutions, and Social Change in the Middle East Steven Heydemann, 2000-12-01 Few areas of the world have been as profoundly shaped by war as the Middle East in the twentieth century Despite the prominence of war making in this region there has been surprisingly little research investigating the effects of war as a social and political process in the Middle East To fill this gap *War Institutions and Social Change in the Middle East* brings together an international and interdisciplinary group of scholars who explore the role of war preparation and war making on the formation and transformation of states and societies in the contemporary Middle East Their findings pose significant challenges to widely accepted assumptions and present new theoretical starting points for the study of war and the state in the contemporary developing world Heydemann's collaborators include political scientists historians anthropologists and sociologists from the Middle East Europe and the United States Their essays are both theoretically sophisticated and empirically rich covering topics such as the effects of World War II on state market relations in Syria and Egypt the role of war in the rise of the Palestine Liberation Organization the political economy of Lebanese militias and the effects of the 1967 war on state and social institutions in Israel The volume originated as a research planning project of the Joint Committee on the Near and Middle East of the Social Science Research Council
