Sleeping With Extra Terrestrials The Rise Of Irrationalism And Perils Of Piety:

Sleeping With Extra-Terrestrials Wendy Kaminer, 2000-10-10 In *Sleeping with Extra Terrestrials* social critic Wendy Kaminer illuminates the various ways in which society has come to value emotion over reason faith over fact and argues that declarations of intense belief have largely taken the place of rational discourse In a world in which How do you feel seems to be a more frequently asked question than What do you know Kaminer's examination of the rise of spiritualism the mushrooming junk science and the habitual merging of political and evangelical speech blazes with relevance and incisive wit Probing the amusing and ominous implications of rampant credulity in our age Kaminer raises important questions and provides a thoughtful and eloquent perspective on the perils of present day irrationalism

Denying Science John Grant, 2011-10-04 Is global warming just scaremongering by climatologists conspiring to protect their jobs Is evolution just a theory Is autism caused by vaccinations The answer to all of these questions is of course no The scientific evidence is now in and it's conclusive on these and many more issues that are fundamental to our knowledge and wellbeing But you'd never know this if all of your information came from the popular media or your upbringing and immediate circle of influence didn't include critical thinking and basic scientific literacy As this witty book with a very serious message shows our culture has in recent decades been characterized by a widespread antagonism toward science and the not always welcome messages it brings Large sections of the supposedly sophisticated populations in the developed nations are in an active state of denial Not only do they deny scientific evidence but they also call into question the very competence of science as a descriptor of reality In short they deny reality The author surveys the gamut of clearly unscientific ideas concerning the food we eat the medicines and potions we are either afraid of or advised to take our sex preferences and a host of other issues that are raised by various panics urban legends and a general climate of misinformation He also examines how special interests from agribusiness to pharmaceutical companies to creationists actively work to distort or suppress scientific findings While the tendency may be to laugh at some of the ridiculous notions catalogued in the author's overview of bogus ideas the overall picture he creates is anything but funny This book reminds the reader that the future of free increasingly complex societies depends on an educated citizenry that is able to think clearly and critically based on reliable information

Why Religion is Natural and Science is Not Robert N. McCauley, 2013-11 A comparison of the cognitive foundations of religion and science and an argument that religion is cognitively natural and that science is cognitively unnatural

young readers looking to find some clarity in a confusing world *Contested Illness in Context* Harry Quinn Schone, 2019-04-30 What makes a disease real Why is it that patients with chronic fatigue syndrome or fibromyalgia are doubted when they say they are in pain and cannot access the same benefits of patient hood that others can What defines the limits of our belief and ultimately compassion when it comes to disease These are the questions approached in this book which draws upon patients experiences and situates them among a diverse set of literatures from the history and philosophy of medicine to the sociology of health and disease The question of a patient s identity and their understanding of disease is often assumed to emerge from their relationship with healthcare but the case is made here that other inter personal factors are more salient What a patient with a contested illness comes up against is not simply a medical categorisation it is a prevailing notion of disease across society and one they struggle to assimilate themselves into *Contested Illness in Context* will appeal to students and researchers interested in fields such as the history and philosophy of medicine the sociology of health and illness medical anthropology or disease and illness generally It may also interest patients and doctors who struggle with difficult medical cases **Jews and the American Soul** Andrew R. than conservatives Conservatives value truth more than liberals and are less prone to cheating and lying Liberals are more angry than conservatives Conservatives are actually more knowledgeable than liberals Liberals are more dissatisfied and unhappy than conservatives Schweizer argues that the failure lies in modern liberal ideas which foster a self centered if it feels good do it attitude that leads liberals to outsource their responsibilities to the government and focus instead on themselves and their own desires
