Dimitrije Djordjevic

Two factors determined the relationship between historians and politics in the Balkans: the role which historiography performed in modern nationalism, and the part which the fairly thin layer of intelligentsia played in the public and political life of Balkan peoples. From the eighteenth century the national (i.e. political) renaissance of Balkan societies found its ideological foundations in historical works and writings. In contrast to the Enlightenment in Western Europe, a similar movement in the Balkans was based on history, its function being to legitimize the revolutionary birth of the nineteenth-century Balkan national societies, to reveal to them their perspectives, and to justify the aggressiveness of their young nationalism. It was by way of history that links were established between the past and the present, between the historian and politics.

The second factor which stimulated the historian's role in politics was the prestige which scholars enjoyed among the Balkan public. In a predominantly peasant society, where the far from numerous intelligentsia was still in the early stages of development, the word 'science' had a mystical, even magical resonance. Scientific was *eo ipso* genuine: the scholar was considered the apostle of truth. The first native intellectuals were absorbed into the state apparatus, which lacked trained people, and rose quickly in the political hierarchy.<sup>1</sup> In nineteenth-century Serbia the 'Higher School' (Velika Skola) became an antechamber for politics. Among the professors who took up politics several were

<sup>1</sup> The 1869 Serbian Constitution (Art. 45) authorized the Prince to nominate one deputy for every three elected. The choice was to be made among "distinguished scholars or people experienced in national affairs". This clause was retained in the 1888 and 1901 Constitutions. Cf. **Saviours of the Nation** Jasna Dragovic-Soso, 2002-10-09 Jasna Dragovi Soso asks why this strong and apparently democratic opposition movement subsequently turned towards an extreme form of nationalism and had by the end of the 1980s accepted Milošević's undemocratic policies Based on the author's extensive primary source research and interviews with key protagonists

Saviours of the Nation examines both the causes and the consequences of the opposition's transformation into a nationalist force. Highlighting the role of historical context it argues that three main factors contributed to the intellectuals' elaboration of a radical nationalist ideology: abandonment of cultural Yugoslavism in conjunction with the post-Tito crisis of the state; difficulties in solving the thorny Kosovo question and relationships between the dissidents and their Slovenian counterparts; Soso also includes a thorough analysis of the Memorandum of the Serbian Academy and the intellectuals' relations with Milošević. She argues that the intellectual opposition's search for Serbian statehood at any price undermined its ability to present a convincing political alternative, allowing the regime to overcome its crisis of legitimacy and continue its reckless and belligerent policies.

**Yugoslavia as History** John R. Lampe, 2000-03-28 An authoritative history of Yugoslavia published in 2000 with a new chapter on the ethnic wars in Croatia and Bosnia and Kosovo.

The Ashgate Research Companion to Secession Peter Radan, 2016-03-23 Secession is a detachment of a territory from an existing state with the aim of creating a new state on the detached territory. Secession is usually an outcome of the political mobilization of a population on the territory to be detached and as a political phenomenon is a subject of study in the social sciences. Its impact on inter-state relations is a subject of study in international relations. But secession is also subject to regulation both in the constitutional law of sovereign states and in international law. Following a spate of secessions in the early 1990s, legal scholars have proposed a variety of ways to regulate the international responses to attempts at secessions. Moreover, since the 1980s, normative justification of secession has been subject to an intense debate among political theorists and moral philosophers. This research companion has the following three complementary aims: First, to offer an overview of the current theoretical approaches to secession in the social sciences, international relations, legal theory, political theory, and applied ethics. Second, to outline the current practice of international recognition of secession and current domestic and international laws which regulate secession. Third, to offer an account of major secessionist movements past and present from a comparative perspective. In their accounts of past secessions and current secessionist movements, the contributors to this volume focus on the following four components: the nature and source of secessionist grievances; the ideologies and techniques of secessionist mobilization; the responses of the host state or majority parties in the host state; and the international response to attempts at secession. This provides a basis for identification of at least some common patterns in the otherwise highly varied processes of secession.

Patriotism Igor Primoratz, 2016-05-13 Economic and cultural globalization and the worldwide threat of terrorism have contributed to the resurgence of patriotic loyalty in many parts of the world and made the issues it raises highly topical. This collection of new essays by philosophers and political theorists engages with a wide range of conceptual, moral, and political questions raised by the current revival of patriotism. It displays both similarities and differences between patriotism and nationalism and considers the proposal of Habermas and others to disconnect the two. Ideal as a supplementary reader for undergraduate and postgraduate courses in politics, political science, especially in political theory.

contemporary political ideologies and nationalism and in philosophy for courses on applied ethics and political philosophy
