Necessary for Economic Growth? Vernon W. Ruttan,2006 Publisher Description **The Next Cold War?** James M. Hanson,1996-09-24 The Next Cold War sounds a warning the United States may be contributing to another cold war through its competitive unilateral and regional economic policies Whereas wars of the past usually resulted from political conflict Hanson warns that a new cold war may result from economic conflict This raises important questions for American policymakers Will the United States be a world leader that promotes cooperation and unity or will it seek to create competition and division Will the United States address the basic problems of population environmental deterioration and economic stagnation in concert with other nations or will it pursue narrow geopolitical and geoeconomic power strategies This fascinating work explores both sides of these questions and poses alternatives that will promote world cooperation and unity *Defense Conversion* Jacques S. Gansler,1996-07-25 Jacques Gansler takes a hard look at the need to convert the industry from an inefficient and noncompetitive part of the U S economy to an integrated civilian military operation Author of two widely read books on the defense industry Jacques Gansler takes a hard look at the need to convert the industry from an inefficient and noncompetitive part of the U S economy to an integrated civilian military operation He defines the challenges especially the influence of old line defense interests and presents examples of restructuring Gansler discusses growing foreign involvement lessons of prior industrial conversions the best structure for the next century current barriers to integration a three part transformation strategy the role of technological leadership and the critical workforce He concludes by outlining sixteen specific actions for achieving civil military integration In Gansler s view the end of the Cold War with the former Soviet Union represents a permanent downturn rather than a cyclical decline in the defense budget He argues that this critical transition period requires a restructuring of the defense acquisitions process to achieve a balance between economic concerns and national security while maintaining a force size and equipment modernization capable of deterring future conflicts Gansler argues that for the defense industry to survive and thrive the government must make its acquisitions process more flexible specifically by lowering barriers to integration This includes among other things rethinking the production specifications for new equipment and changing bids for contracts from a cost basis to a price basis Gansler point out that by making primarily political and procedural changes rather than legislative ones companies will be able to produce technology for both civilian and military markets instead of exclusively for one or the other as has been the norm This dual use approach would save the government billions of dollars annually and would enable the military to diversify by utilizing state of the art Democracy and Security Matthew Evangelista,Harald Muller,Niklas Schoernig,2009-12-04 This edited book offers a broad examination of how democratic preferences and norms are relevant to security policy beyond the decision of whether to go to war therefore providing a fresh understanding of state behaviour in the security realm **The**

Process and Politics of Defense Acquisition David S. Sorenson, 2008-12-30 The United States government invests billions each year on equipping armed forces with the most advanced military equipment The root of the American defense acquisition system is driven by a combination of national interests and domestic political requirements While fundamentally the defense acquisition system has produced results for the United States military improvements are needed in order to continue to move forward in advancing military tactics and technology Exploring both the systemic and political levels of the system Sorenson argues that the United States will fall behind if the current defense acquisition system is not reformed This book brings together elements of this complicated system such as national security requirements and the changes that are needed in both the structural and political pillars A combination of political interests and the needs of the military serviced by an ever shrinking defense industry make a genuine acquisition reform even more difficult resulting in reform that is more symbolic than genuine

The Adaptive Military Arthur Asa Berger, 2017-07-05 When the cold war ended many hoped it signified enhanced prospects for a more stable world However despite favorable political developments the post cold war period has been marked by turbulence uncertainty and challenge The actions of rogue states such as Iraq and North Korea have made nuclear proliferation more unpredictable Violence in Somalia and Bosnia has cast doubt on the viability of international peacekeeping arrangements Hopes for expanding democratization have been dimmed by assertions that the values of liberal democracy and human rights are incompatible with non Western cultures The Adaptive Military describes how military security policies and practices have adapted to these new times and explains why such changes are necessary The central argument is that current conflicts have been shaped by long term trends which increased the number and complexity of threats that the developed world is supposed to meet and correspondingly decreased the stock of social and political options available to meet them Although the authors differ in their assessments about the current prospects for peace and ways to maintain security the issues they address are as critical as they were at the end of the Cold War

Mobilizing resources and political support for remote and difficult enterprises will always remain contentious but if we recognize the hazard of letting violence run unopposed throughout the world then we bear some responsibility to consider how it might be checked This volume is an exercise of that responsibility It will be of great interest to experts in military studies and international relations
