Dinosaurs Author Bio Publisher Introduction Greetings young reader Today we are going to take a step back in time and
enter the age of the dinosaurs The dinosaurs are an extinct species of animal that began to live on the Earth over 200 million
years ago Extinct means that they no longer exist The dinosaurs are some of the most intriguing and awe inspiring animals
that have existed on our planet The dinosaurs colossal size strange characteristics and mysterious disappearance make them
inherently worthy of study and interest Even more than these reasons the study of dinosaurs itself is an incredible adventure
which requires thought and imagination The study of dinosaurs helps you to appreciate just how mysterious and amazing life
and nature really is Our planet supports not only us and the animals that live today but it even supported creatures as
gigantic and strange as the dinosaurs just think how cool that is I hope that you bring a spirit of openness and wonder to your
study of the dinosaurs and that you come to appreciate the mystery and value of the dinosaurs The Spinosaurus is a well
known dinosaur because of its tremendous size and the sail like growth that protrudes from its back The Spinosaurus was
also the star of a very recent and popular dinosaur movie We are going to discuss the strange appearance of the Spinosaurus
the behavior and the dinosaurs that it lived with We know what we know about the dinosaurs from a variety of sources
including fossils biology and other scientific disciplines Fossils are the ancient remains of the dinosaurs the most familiar
being their bones Biological science is the study of life in general but many scientists compare the dinosaurs to modern day
animals to support their theories Before a talk about dinosaurs can take place it is important that we discuss the theory of
evolution Evolutionary theory supposes that all the animals we know and see today are the direct descendants of animals that

existed millions of years ago The dinosaurs and other creatures that existed millions of years ago either died out or gradually changed into different animals For instance birds are considered to be surviving dinosaurs because their dinosaur ancestors survived the dinosaur extinction event we will discuss this later
